

Lattice Systems LED Wallpaper

Meystyle

Philosopher Hegel once compared architecture to frozen music. The Lattice System Chandelier is a symphony of lines and rhythms playing with the modular simplicity of a modernist aesthetic. Its angular rigor opposes its intentionally chaotic composition resulting in a balanced, yet never fully settled harmony.

This print gives a real illusion of a 3D chandelier adorning your space. When used as the only light the 21 LEDs provide very subtle ambient lighting around the wall in full darkness. Tip! Use spotlights to make the crystals shine.
