cm/inch

METEO marks the beginning of a new collaboration between Kettal and Konstantin Grcic. It aims to explore the largely untapped design potential of modern parasols. Protection from direct sunlight is becoming a quintessential condition for our health and wellbeing. The increasing impact of parasols and other sunshade systems on the planning and furnishing of modern cityscapes, recreational resorts and private dwellings gives rise to the challenge of a renewed approach to this specialized product category.

Meteo shade equipment is rigorously tested to withstand incredible forces of nature, KETTAL does not recommend or warranty the deployment or use of any collapsible shade equipment in wind conditions which exceed 45km/h - 20 MPH.

Maintenance

Clean with mild soap using sponge or cloth. Be gentle while cleaning, do not scrub aggressively the fabric. Once cleaned please make sure you remove soap excess.

In case of aggressive stains clean with diluted household bleach.

Clean stains promptly. The longer it remains, more difficult will be to remove.

Once cleaned the fabric steam iron the fabric. Just use steam, be careful NOT placing the iron directly in the fabric it will get damage.
