#### Notes:

The concrete shelves are molded one by one; due to the material's intrinsic nature, different tops, even belonging to the same lot, can present differences in the surface colour and texture.

The concrete shelves are treated to limit the absorption of liquids and greasy substances.

The Glaze tops are created by manually glazing molded elements in porcelain stoneware. The possible, slight colour and appearance differences of the tops are unpredictable and represent the value and featuring characteristics of a fully handcraft work.
