Design Hangar Group

PEGGY SP

White and black. From this chromatic and material polarity Peggy was born. This lighting design by Hangar Design Group combines the lightness of white blown glass, entirely handmade, with the liveliest character of the polished, lead-coloured metal. The effective combination communicates rationality and elegance at the same time. It is no coincidence that this system illuminates the café of the Peggy Guggenheim Museum in Venice. Available in the following versions: suspension and applique. White glossy glass. Metal parts finishing in glossy black and painted brass.
