

# Stars LED Wallpaper

## Meystyle

The Stars design brings the elegant geometry of the night sky into the home. It embodies the unexpected synthesis of the organic with the man-made.

The most versatile design in our range. This LED wallpaper gives your walls a subtle texture and then transforms them into the night sky when you switch it on. When used as the only light the 12 or 23 LEDs provide very subtle ambient lighting around the wall in full darkness. 39 LEDs will allow you to move around an average-sized room comfortably without the need for another light source.
