MATERIALS

FRAME STAINI ESS STEEL

STAINLESS STEEL

Brushed hairline finished Stainless Steel, type AISI304 18/08 with 18% chromium and 8% nickel

Wall thickness of the Stainless Steel tubes: 2mm.

OPTIONAL: we recommend the electropolishing treatment of the frame if it is to be used in a corrosive environment.

STAINLESS STEEL BRUSHED

ELECTROPOLISHED STAINLESS STEEL

COATED ALUMINUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it

especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

WHITE SAND BLACK

TOP GLASS

Its resistance to staining and scratching makes glass a highly suitable material when making tabletops for outdoor furniture.

PEARL GREY

CERAMIC

Ceramic table tops are made of inorganic materials that crystallise at very high temperatures and are thus very hard and resistant to wear.

TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.
