

DESCRIPTION

The Tosca collection is simultaneously warm and inviting, stylish and intriguing. An elegant seating shell in powdercoated stainless steel is upholstered with extra-large, vertical braiding. The braiding material is genuinely innovative: foam mousse is encased in a seamless sheath of knitted textilene and polyolefine which makes the material weather-resistant, but also surprisingly soft to touch. The seating comfort is especially pleasant thanks to the comfortable outdoor cushions.

MATERIALS

- Frame: 304 stainless steel, powdercoated with an ultra durable polyester coating
- Upholstery: braiding with EPDM foam mousse in a knitted sheath of Tricord (polyolefine) and textilene. UV-, rot and mildew resistant. Tested in Xenon tester 2500 hours, QUV tester 2500 hours and 1 year real weather test in Belgium and Singapore
- Seat: Batyline®
- Table top: ceramic.

CUSHIONS

The filling has a cover in a laminated, water-repellent polypropylene material which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra covering. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding. Fabrics available in category D, E & F.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

MAINTENANCE

Braiding and Frame

Rinse the braiding regularly with clean water. For intensive cleaning, use Synthetics Super Cleaner (D9922). This cleaner also works perfectly for the powdercoated stainless steel frame. Always rinse the furniture with clean water after treatment with Tribù cleaning agents. Allow the braiding to dry and treat with Textile Protector (D9924). This will apply an invisible repellent film which enables the furniture to dry quicker and reduces the adhesion of dirt, stains and pollution. The cleaning will become easier, less frequent and requires mainly rinsing with clean water.

Table top Ceramic

Ceramic is very easy to maintain with clear water and a pH-neutral soap. Stubborn stains can be removed with Glass & Ceramic Cleaner. To protect the ceramic, Ceramic Protector can be used. This applies a highly water and soiling repellent coating, which also makes the surface brighter, smoother and easier to clean.
