

ToTeM Collection

Designed by Albi Serfaty

The ToTeM collection represents 3 different lamps: To, Te, M; which can be used as individual pendants or as a combination of 2, 3 or more pendants. The new hanging technology allows the user to easily stack the lamps on top of each other. The combination and order of lamps can be chosen as desired. The polymer skin of the ToTeM collection's shades is sprayed over a black metal construction and illuminates the lamp in a soft and elegant light.

100-240 V
