

Aplomb, wall design Lucidi e Pevere 2014

Aplomb wall lamp is an exploration of the expressive possibilities of rough concrete made fluid in its mould and thrilling to see and touch thanks to its special amalgam. Like the original suspension model, the Aplomb wall lamp seems to come from another dimension: from the world of architecture and building - echoed in its raw material - to the domestic environment. The oblique movement of the diffuser merges into and dialogues with its supporting structure and allows for wider ranging light diffusion. The concrete blocks the light completely and then

releases it from both the large opening at the top and the smaller one at the bottom. The beam of light directed upwards is reflected onto the walls and ceiling, lighting up the room without ever dazzling. The more delicate beam of light directed downwards, by contrast, creates a sophisticated interplay of light on the walls. Aplomb wall lamp is available in grey, a colour which highlights the materials used to make it, an elegant white and a warm brown colour. It is ideal in all rooms which speak a direct, minimalist architectural language especially if they make use of visible rough-hewn

materials individually or in perspective sequences along walls or corridors.

Aplomb, wall technical info

Description

Wall lamp with indirect and reflected light. The lamp body is made of cement, consisting of a special amalgam coloured with pigments, produced by pouring the fluid mixture into a mould. Internal parabola-shaped brushed steel diffuser, mount and wall mount in painted metal. The light is also diffused downwards, through an opening at the base of the diffuser that is protected by a glass disc with an acidetched finish.

Materials concrete, varnished metal and aluminium

Colors white, grey, brown

Model

Aplomb LED

Weight

net lbs: 4,41
gross lbs: 6,61

Packaging

vol. cub. ft.: 0,706
n. boxes: 1

Bulbs

LED included 14W 2700°K Im CRI>80 86 lm/W

Dimmable only with SEOUL-ACRICH LED modules dimmer

Brightness light

semi-diffused and indirect light
