

GLISS MASTER — VINCENT VAN DUYSSEN 2015

1—
64

Gliss Master develops the concept of storage and space organisation. This approach permits maximum uniqueness and customisation. It is a tailor-made design for a wide range of doors, accessories and finishes, which creates systems adapted to individual needs. The Gliss Master range can be combined with accessories and different finishes, drawing on the components of each series to create exclusive solutions. The 2023 collection includes two new doors - Linear by Vincent Van Duysen and Blend by Rodolfo Dordoni, and a new set of accessories and interior customisations. It is a system that reflects the importance of a tailor-made approach for Molteni&C.

MODULARITY

Modularity - Structure

The widths 492 - 656 - 820 - 984 - 1312 - 464 (term. element) mm (19 3/8" - 25 7/8" - 32 1/4" - 38 3/4" - 51 5/8" - 18 1/4") include the left side panel. The total width of the composition will include the final panel of th. 30 mm (1 1/8").

Heights:

tot. H 2343 (92 1/4"), door 2313 (91"), int. 2253 (87 3/4"), sliding or flush sl. door inter. 2163 (85 1/8")
 tot. H 2439 (96"), door 2409 (94 7/8"), int. 2349 (92 1/2"), sliding or flush sl. door inter. 2259 (88 7/8")
 tot. H 2631 (103 5/8"), door 2601 (102 3/8"), int. 2541 (100"), sliding or flush sl. door inter. 2451 (96 1/2")

tot. H 2919 (114 7/8"), door 2889 (113 3/8"), interior 2829 (111 3/8"), only hinged

Assembly instructions

For the assembling of a sliding and a flush sliding door wardrobe a minimum space of 6 cm (2 3/8") is required considering the minimum height of the compartment.

Assembly of the corner element (for wardrobe with doors) requires a minimum extra height of 6 cm (2 3/8").

Assembly of a wardrobe in an alcove requires a minimum extra side space of 4 cm (1 5/8"). This space can be reduced to 15 mm by using special hardware provided on request for the side compartment. Surcharge per compartment.

This hardware may only be applied if there are open compartments, hinged doors (excluding SISTEMA 7) and wooden side panels.

For hinged door wardrobes with lighting systems and/or SISTEMA 7 doors this product requires a minimum height of 5 cm (2").

The height can be reduced to 15 mm by inspection on top cod. **PAISPC01** (see page 33 price list).

DOORS

START-HOLLOW hinged doors

applicable only on structures with wood sides

The pairs of hinged doors START and "A FILO" always have a handle mounted on the right door.

FIND-ME-QUICK-"A FILO"-BAMBOO hinged doors

applicable only on structures with wood sides

GRIP-BLEND hinged doors

applicable only on structures with wood sides

NICHE doors

applicable only on structures with wood sides

In the pairs of hinged doors W 815, 979 and 1307, are available 2 handles or handle only on right door.

LINEAR door

applicable only on structures with wood sides

Hinged LINEAR doors are made with hinges concealed in the side panels

GLASS-SISTEMA 7 doors, th 35

applicable on all types of structures

GLASS doors are made with 180° hinges built into the side (a Molteni exclusive)

Sliding doors

It is possible to make sliding door wardrobes with doors of the following types:
- QUICK
- START
- "A FILO"
- GRIP
- BLADE

It is possible to make the external sliding door with two handles if using the QUICK, "A FILO" or BLADE door (full-height handle) and applying the surcharge

Detail of side panel with extension profile

with BLADE door

Flush sliding doors

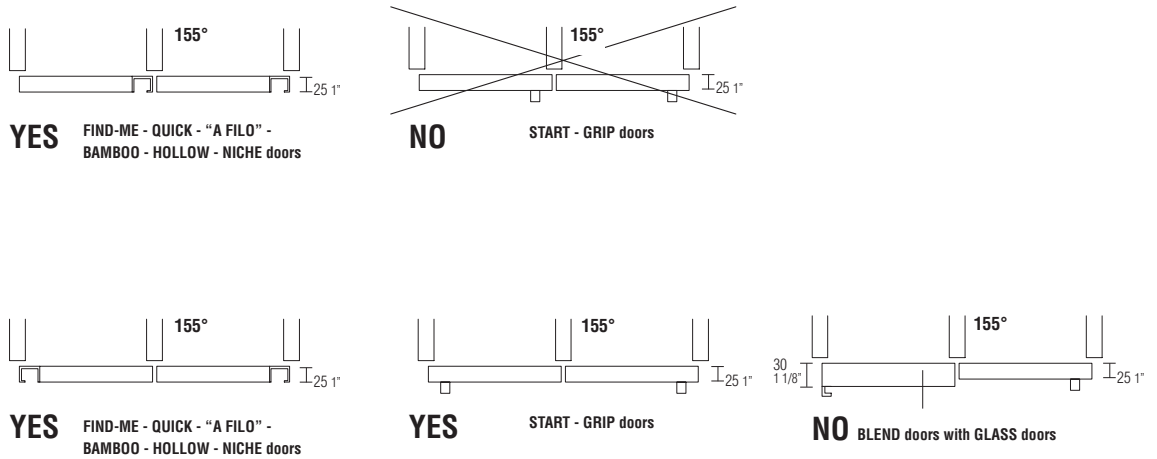

DOORS

155° opening (only for compartments with wooden sides)

On **FIND-ME - QUICK - START - "A FILO" - BAMBOO - HOLLOW - GRIP - NICHE - BLEND** doors it is also possible to use 155° opening hinges, with an extra charge per individual door. In this case, it is necessary to take special care in inserting internal drawer units, trinket trays and devices.

155° hinges cannot be used on 'A FILO doors (mirror and glass) with width over W 487.

It is also necessary to comply with the diagrams provided here.

Hinged doors with key lock

For the hinged doors specified, a key lock can be fitted to order. The additional cost for one or two doors. It can even be fitted on a terminal element or a corner element (in compliance with the handle installation rules).

For doors with a lock, the internal drawer units must be suspended.

Installation of only the lock can be requested, without a handle, always considering the price of the START doors and the additional cost of the lock.

For LINEAR doors, see page 102 price list because they have special locks.

SISTEMA 7

A new folding opening system with a patented mechanism which makes it possible, in the 180° version, to open the unit entirely. The mechanism, light and silent, does not require tracks and therefore allows use of the full height.

The hinged doors enable 180° opening and wardrobe width made to order; the special hinge pins are anchored to the base and the cover.

Anyhow, SISTEMA 7 hinge doors can be used (see p. 14/15 price list).

The 90° opening, on the other hand, is an intermediate solution that can solve design problems while maintaining a uniform design.

The thickness of the wood and glass door are 35 mm.

SISTEMA 7 can be applied to all Gliss Master structures with wood, glass or frame sides, but cannot be used with other Gliss Master doors.

The 90° and 180° folding door is applied to modules with width 790 and 954, while the hinged door is applied to single modules 380/462/626, double modules 790/954/1282 and the corner unit (see pag. 16 price list).

The 380 mm unit is specific for SISTEMA 7 with hinged door.

Reductions

90° and 180° folding openings can be reduced in height only.

180° hinged openings can be reduced in height and in width up to 405 mm.

Notes

The side panels follow the same logic as Gliss Master (see drawing ●).

★ = 180° Hinged (necessary for 180° opening and for wardrobes with width made to order)

90° Folding opening

If the 90° folding door is on an end unit with external door, provide filler:
50 mm (790 compartment)
120 mm (954 compartment)

180° Folding opening

Mixed 90° / 180° Folding openings

180° Corner opening

CORNER ELEMENT

Open corner element P 595

The open corner element is supplied complete with base, top and backs (melamine faced structure, piqué or fine grain). The melamine-faced, frame or glass central partitions must be inserted between the corner element and the adjacent modules.
The open corner element can also receive a side panel to close the composition.

Doors can be applied to the open corner element by following the rules below:
- GLASS door (180°) on corner element 1282x1282 / 1101x1101 with all types of side panels (wood, frame or glass);
- SISTEMA 7 door (180° hinged and 180° folding) only on corner element 1101x1101 with all types of side panels;
- QUICK and "A FILO" door (155°) only on corner element 1101x1101 with wooden side panels.
- LINEAR door only on corner element 1101x1101 with wooden side panels.
Compartments adjacent to the corner element can be either open or closed with the same door model.

Notes

The shelf is not included in the price of the corner element.
LED lighting bars can be applied to the shelves and lids, as shown in the drawing below.

Reductions

The corner element can be reduced in height, width and depth.
Width reduction can only be performed on one side or on both sides up to a minimum width of 1101 mm (see procedures on page 32 price list.).

Depth reduction can be performed on either one or two sides up to a minimum depth of 435 mm. If only one side is reduced, it will be the one with the longer shelves (*).

Solution with GLASS door

Solutions with SISTEMA 7 (only for corner element 1101x1101)

180° folding

180° hinged

Solution with QUICK, "A FILO" and LINEAR doors* (only for corner element 1101x1101)

The corner element can be fitted with shelves and clothes rails, or with this solution of drawer units that have a central partition H 1158 where the desired drawer unit can be inserted. The drawer unit can be with fronts W 420 or 584.

No type of drawer unit can be inserted with frame or glass sides

Placing LED lighting bars

STRUCTURE

Structure for walk-in closet

In version **A**, the structure (base, lid, central partitions, back and side panels) is in melamine, in the same finish as the structure.

The back piece can also be provided in fine grain finish or in glass max H 2631.

The side panels are always provided without extension profile (see detail).

In version **B**, the central partitions and sides are made with an aluminium frame with pewter colour, bronze or iris finish, with or without glass.

Base, lid and back piece are in melamine, in the same finish as the structure.

The back piece can also be provided in fine grain or glass finish max H 2631.

Horizontal tags on the base and lid are made in a pewter colour, bronze or iris finish like the side frames.

In version **C**, given the presence of frame sides in pewter colour finish, the central and side partitions in melamine are also made with front tags in pewter colour, bronze or iris, considering the specific price.

Reductions

See procedures on page 32 price list.

** Notes

The central melamine sides with front profile, frame and glass are available with an Eco Skin insert, only for use in walk-in closets

STRUCTURE

Linear modules

Linear modules are made up of a base and lid always made in melamine in the same finish as the structure.

The back is available in the three versions indicated below.

A1 and **A2** can be reduced in height, width and depth if closed by sides and doors that are compatible with the requested reductions.

A3 can be reduced only in height.

Central partitions

These are available in melamine, in the same finishes as the structure, frame and glass. The melamine version can be reduced in height and depth.

The frame and glass versions can be reduced only in height.

Compartments with frame or glass sides must always include a shelf or a drawer unit.

A version with an Eco Skin insert is available for use in walk-in closets.

Side panels

These are available in melamine, in the same finishes as the structure, frame and glass. The melamine version can be reduced in height and depth.

The side exterior is available also in matt lacquer, glossy lacquer or wood finish (vertical grain), as shown on p. 8 price list.

The standard finish on side panels is an extension profile in the coloured matt lacquer, pewter colour, bronze, iris (to be specified in the Order). The extension profiles for glossy lacquer or wood side panels always match the side panels of the same finish.

The frame and glass versions can be reduced only in height.

Compartments with frame or glass sides must always include a shelf or a drawer unit.

Reductions

See procedures on page 32 price list.

Molteni & C

10—
64

A1 - Melamine back

A1

Base, lid and back made in melamine finish matching the structure. The back is available also in piqué

A2 - Back in fine grain, matt lacquered colours, wood

A2

Base and lid made in melamine finish matching the structure. Back in fine grain, matt lacquered colours or wood.

A3 - Glass back

(only hinged GLASS, closet and SISTEMA 7 glass)

A3

Base and lid made in melamine finish matching the structure. It is possible to produce single finished modules W 790/954 with lateral pieces in glass by using the glass lids (see p. 57 price list)

Central partitions, th 30

Warning:

frame sides and glass sides will only have holes at the position of the shelves. Complete hole series at regular intervals 96 mm will involve an extra charge per side.

TWO-SIDED CORNER WARDROBE COMPOSITIONS WITH OUTWARD SWING DOORS

Many of the solutions described below can be created with Gliss Master. These layouts can be installed either with or without the external corner module.

** For this side, please consider the wooden side panel surcharge.

Solution A:
Outward swing doors
(NO glass back panels)

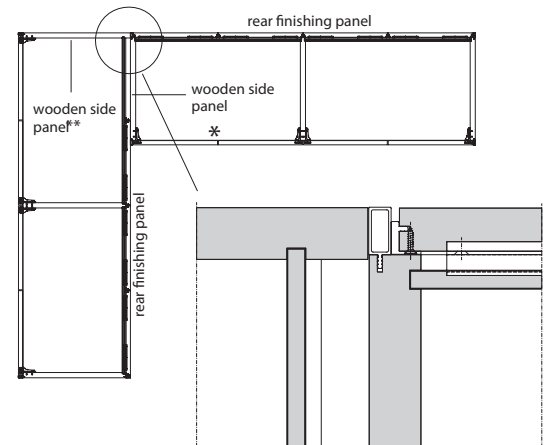

Solution B:
Outward swing door + Walk-in Closet
(NO glass back panels)

Solution C:
Outward swing door + Inward swing door
(example with glass back panels)

Solution D:
Outward swing door + Inward swing door
(example with rear finishing panel)

* This compartment can be closed with a QUICK, "A FILO" and NICHE door (vertical and horizontal).
For glass backs, drawer units are mandatory for compartments with frame or glass sides.
For melamine structure, pique, matt lacquered colours, wood or fine grain backs, use drawer units that are narrower than the module.

EXTERNAL CORNER UNIT

External corner unit

- It can be either open or fitted with doors.
- It is always secured to the melamine central partitions of the adjacent wardrobes.
- The front profile can have a matt lacquered, pewter colour, bronze and iris finish.
- Height, width and depth can be reduced.
- The external corner unit can be closed in all hinged door models.

Reductions

The external corner unit can be reduced in height, width and depth.

* For this side, please consider the wooden central partition surcharge.

SPECIAL PROCESSING - SHAPING

Only on hinged door compartment

- Costs to consider:
- Back cut
 - Lid cut
 - Fixed shelf with surcharge for cut (see page 133 price list for solid wood shelves)
 - Back, fixed price (for all finishes)

- Costs to consider:
- Back cut
 - Base/lid/shelf in solid wood
 - 2 cuts per shaped piece
 - 2 additional panels (melamine structure)
 - Possible cut in side

Notes

- Shaping in both height and width cannot be done on the same compartment.
- Confirmation to the customer of the feasibility of shaping will only be given after checking with the Molteni&C Technical Office.

Custom cuts for attics

Doors with slanting cut (only for wardrobes with solid wood sides)

When preparing the order, indicate heights H1 and H2, as well as the width L, as shown in the example.

The price for the slanting cut for each door is the same as cutting for a hinged door, as shown in the doors pages.

In this case a single module must be used with a QUICK, START, "A FILO", HOLLOW and GRIP hinged door, with the melamine facade and matt lacquered finishes, hinged on the higher side.

The structures can be standard or made to size.

Standard or made to size doors (only for wardrobes with solid wood sides)

Double compartments with hinged doors can be used for this solution.

FIND-ME door th 25

Door with full height vertical finger recess included in the door thickness.
The door is available in a hinged version in wood.

All the hinged doors have cushion-closing hinges.

Hinges with 155° opening can be used and a key lock can be installed on hinged doors.

The FIND-ME door can be made with LINEAR invisible hinges for matt lacquered colours, 3D matt lacquer, lunar, and wood finishes with a cost supplement per door.

Reductions

FIND-ME doors can be reduced as shown on p. 32 price list.

Notes

With 3D lacquer, glaze, and lunar surfaces, the outside of the side panel can be made with a matt lacquer finish or a laminate faced finish like the internal structure.

To match the glaze finish door, we advise the side exterior finish in dolomite grey matt lacquer with finger recess and extension profiles in pewter colour, bronze or iris.

To match the lunar finish door, we advise the side exterior finish in clay matt lacquer with finger recess and extension profiles in pewter colour, bronze, iris.

“A FILO” door th 25

Door with full-height handle included in the thickness of the door.
The door is available in the versions wood and glass.

All the hinged doors have cushion-closing hinges.
The sliding door have a shock absorber mechanism which allows them to open and close softly.
Hinges with 155° opening can be used and a key lock can be installed on hinged doors (see page 53 price list).

The “A FILO” door can be made with LINEAR invisible hinges for melamine front, matt lacquered colours, 3D matt lacquer and wood finishes with a cost supplement per door.

Reductions

“A FILO” doors can be reduced as shown on p. 32 price list.

Notes

Sliding doors and flush sliding doors are not available in H 2889.
Glass hinged doors are not available in H 2889.
Flush sliding glass doors cannot be used in compositions with 3 doors.

With surfaces in cartapaglia melamine, silk, 3D lacquer, and glaze, the outside of the side panel can be made with a matt lacquer finish or melamine like the internal structure.

To match the glaze finish door, we advise the side exterior finish in dolomite grey matt lacquer with “a filo” handle (full height) and extension profiles in pewter colour, bronze or iris.

SMOOTH door th 25

Door covered in Eco Skin or BLEND fabric in the colours in the Molteni range, featuring a full-height handle recessed in the width of the door and a perimeter profile that outlines the edge.

All the hinged doors have cushion-closing hinges.
Hinges with 155° opening can be used.

Reductions

SMOOTH doors can be reduced as shown on p. 32 price list.

Notes

With Eco Skin or BLEND fabric surfaces, the side panel exterior can be made with a matt lacquer finish or a melamine finish like the internal structure.

BLEND door and external drawer design Rodolfo Dordoni

Hinged doors with perimeter profile characterised by a vertical decoration and the possibility of being combined with an external lower drawer.

29—
64

Technical information

- The hinged doors cannot be applied to frame or glass sides and to open corner units (1101x1101 - 1282x1282).
- The compartment above the drawer must always be closed with BLEND doors and cannot be equipped with central dividing sides.
- The protruding base, with one or more modules, must always be hooked to at least one side panel of the wardrobe.
- The decorative profile cannot be made on doors smaller than 487 mm wide.
- The drawer cannot be adjacent to the corner element (658x658).

BLEND door and external drawer design Rodolfo Dordoni

All hinged doors are equipped with soft closing hinges.
It is possible to use hinges with 155° opening on hinged doors.

Fabric colours

- bark brown
- moss green
- olive green
- oxide orange
- vanilla

Notes

In pairs of hinged doors, the handle is fitted on both doors.
The door covering fabrics are specific for this use and feature a water-repellent surface treatment (Scotchgard).

GLASS door th 35 design Vincent Van Duysen

Glass door with 180° opening made with a special soft close hinge inserted in the profile and completely hidden in the side (exclusively by Molteni).
A full height handle is designed in the profile.

Integrated lock with coded key

GLASS hinged doors with integrated lock are available, taking into account a surcharge for single door or pair of doors.
As standard, all lockable doors in a wardrobe will have different coded keys.
On the pair of doors, the lock will always be applied to the right door.
The lock is not applicable to hinged doors of the external corner units.

Reductions

GLASS doors can be reduced as shown on p. 32 price list.

Notes

The GLASS doors are available with H 2889 only for widths 487, 815, 979 and for the corner unit 1101x1101.

In the pair of hinged doors, the handle is mounted on both doors in the pair.

The GLASS door can also be installed on the open corner module.

LINEAR door th 25 design Vincent Van Duysen

All the doors applied to the linear modules are equipped with new generation concealed hinges on the side panel, with soft closure.
For use on the 1101x1101 corner element, the glass doors are equipped with pivot hinges (SISTEMA 7), while the wooden doors with traditional 155° hinges.

A handle with lock is available considering a surcharge for single door or a pair (for wood and glass doors).
The lock is not available for corners 1101x1101.

Reductions

The LINEAR doors can be reduced to the millimetre in height and width.

Notes

LINEAR doors cannot be applied to frame or glass sides.
H 2889 hinged doors are available only in W 405/487.

To match the lunar finish, we advise the side exterior finish in matt lacquered argilla and the extension profiles in the same finish as the handle.

SISTEMA 7 doors th 35

With SISTEMA 7 it is possible to create passageway solutions with doors fastened to Gliss Master wardrobe structures.
This type of solution requires the insertion of a lid between the sides of the wardrobes.
It can be opened thanks to a 180° folding door in wood or glass.

Reductions

180° folding doors can be reduced in height only.

Notes

Doors are not available with H 2889.

35—
64

SPECIAL ELEMENTS

Column with open compartment

- Can be inserted only in wardrobes without doors or with hinged doors.
- Central partitions and/or lateral pieces close the column and cannot be frame or glass.
- The open compartment is always in matt lacquered colours.
- Doors are always without handles because they protrude with respect to the structure.
- Drawers are fitted with the "E" handle of the START door.
- Front finish: melamine front, matt lacquered colours, glossy lacquered colours and wood.

* **The price does not include the central partitions or side panels, nor the internal shelves.**

Reductions are allowed only in height, and costs of cutting the structure and doors are applied. Open compartment and lower part cannot be reduced.

Wire passage **EPA1 Ø 60** chrome on request on back.

Notes

The back of the open compartment cannot hold a mounted TV.

Reductions

SPECIAL ELEMENTS

Column with external drawers

- Can be inserted only in wardrobes with hinged doors.
- Central partitions and/or lateral pieces close the column and cannot be frame or glass.
- Pairs of doors always have only one handle mounted on the right door.
- Drawers are fitted with the "E" handle of the START door.
- Front finish: melamine front, matt lacquered colours, glossy lacquered colours and wood.

Reductions

Reductions are allowed only in height, and costs of cutting the structure and doors are applied.

* The price does not include the central partitions or side panels, nor the internal shelves.

FILLERS AND OPENING SIDE TRIMS

Horizontal filler

The filler is supplied in two parts, one part to be fixed to the ceiling to which the other will be hooked on (see diagram below).

The distance of the filler from the door is the client's decision.

In the cartapaglia finish, the grain direction is always vertical.

In the wood, lunar, glaze, 3D lacquer finish, the grain is always horizontal.

Vertical filler

The vertical filler can be placed flush with the structure or the door.

This detail must be specified in the order to prepare the side panel (see example).

If this detail is not specified when placing the order, the filler will automatically be placed flush with the structure and the side panel will have the extension profile.

Opening fillers

Can be made with START and "A FILO" door. For handles, consider surcharge.

Always have the 155° hinges.

Are the same height as the other doors in the composition.

Have a closing strip on their lower part.

In the wood finish, the grain direction is always vertical.

Horizontal filler side sections

LIGHTING SYSTEM

Lighting bars with front LEDs

Internal compartments of Gliss Master wardrobes can be equipped with front LED lighting. The lighting bar can be applied to lids or to wooden, transparent glass and Eco Skin shelves, wood and glass shoe rack shelves. Using the electrified wire strip installed on the side (wood, frame or glass), the shelf can be moved. For each compartment length, we have made specific lighting bars with wiring compliant with European safety standards.

A wire strip is not needed if the compartment only has lighting on the top piece.
Lighting bars can be reduced with a surcharge for the shelf cutting.

Horizontal and vertical LEDs cannot be used for the same composition.

Notes

When placing the order, the customer must indicate how many shelves with lighting bars are required.

For assembly: a lighting system on wardrobe with hinged doors requires a minimum extra height of 5 cm (2").

The height can be reduced to 15 mm by inspection on top cod. PAISPC01 (see page 33 price list).

Individual wire strip is always installed on the left side panel of the compartment, with the exception of corner units for walk-in wardrobes and of the compartment next to the corner unit.

When ordering, indicate compartments with wire strip.

The electrified wire strip is mandatory for wardrobes with wooden sides and glass back.

Clothes rails

For use only with wood shelves.
Black finish.
Supplementary cost for cut in width.

Drawer units

Floor-standing or wall-mounted drawer units with drawers H 190 mm equipped with handles in black finish.

2, 3, and 4 drawer versions cannot be modified.

The drawer units are not stackable. In the event that requirements are different, use standard modular drawer units.

The width of the drawer units can be reduced for a surcharge:

SMART INTERNAL FITTINGS

Vertical Internal LED Lighting

The vertical illumination can only be used on central or lateral wooden side panels.
Cannot be used with GLASS, SISTEMA 7 and LINEAR doors.
Horizontal and vertical LEDs cannot be used in the same composition.
LED bars can be reduced without a supplementary charge.

In the case of hinged doors with a lighting system, a minimum space measuring 5 cm in height is required. The height can be reduced to 15 mm by inspection on top cod. **PAISPC01**.

INTERNAL ACCESSORIES

Aircub is an air purifier and aromadiffuser that eliminates up to 95% of the harmful agents inside wardrobe through a process of ionisation and ozonation. Aircub can be managed easily from your smartphone with a dedicated app. Aircub can be installed on the back panel of each compartment by using the specific multi-socket connector. Aircub has a single plug.

Up to 3 Aircubs per wardrobe can be installed using the specific multi-socket connector. Information about Aircub is available on the website <https://shop.check-up.it> in the projects section.

SOFT LINE INTERNAL FITTINGS

- ▶ The SOFT LINE equipment can be used in units with frame, glass and wooden side panels and with all types of backs.
- ▶ In case of application on the glass/frame side panels, the special metal profiles PST/PSV must be used. These are not included in the price of the trays.
- ▶ The pull-out frames of the SOFT LINE equipment cannot be combined with modular drawer units.
- ▶ **No reductions of any kind are possible.**

Notes

- The SOFT LINE equipment should not be used:
- in corner units
 - in units close to corner elements in wardrobes with doors
 - in units closed by overlapping sliding doors.

GLASS LID FOR CHEST OF DRAWERS

To be used only in compartments with wooden sides

Modular chests of drawers can be made with a transparent glass lid in the module widths 790/954/1282.

It is mandatory that the first drawer be H 190 in wood (special measure).

Drawer dividers cannot be inserted in the first drawer.

The top can be fitted with a LED lighting bar, but it cannot be connected to the cable holder.

The connection to the power cord has to pass behind the back panel.

Eco Skin bottoms in grey can be inserted.

SPECS/17

CAVE handle

Internal fittings - modular drawers and trays

Notes

The parts of this internal fittings are produced with width and height dimensions corresponding to the modular compartments. This makes it possible to organise the internal spaces in a number of ways. To correctly and quickly determine the internal fittings, some of the possible compositions are in the following pages.

When ordering, specify the handle finish as pewter colour, bronze or iris.

For the CAVE handle covered in Eco Skin, add a supplementary charge each

No reductions of any kind can be made on drawers, trays and pairs of side panels.

The pairs of side panels p. 153 price list or structures p. 154 price list are necessary for inserting all the elements. Compositions must be completed with an upper shelf (p. 133 price list) or glass cover p. 139 price list.

Warnings on using compartments adjacent to the corner element

It is impossible to use trouser or trinket trays (used individually).
