

Molteni & C

HORIZONS — DANTE BONUCCELLI 2020

1—
4

With Horizons, a cupboard for the daytime area, Dante Bonuccelli proposes a different way of storing, and at the same time displaying much-loved objects. Two tip-up doors, which, when closed, reveal the contents thanks to both the transparent stopsol glass and the internal LED lighting, and when open, folded back against the side of the piece for full access to the internal space, transform the sideboard like a chameleon. Inside the exquisitely detailed graphite oak structure, the two suspended drawers and the top shelf, which re-divides the space, are enhanced with calacatta gold marble or glossy lacquered back panels in the colours of the Molteni range. The pewter colour framed and transparent stopsol glass doors are available with or without the graphite oak cross pieces. The former feature asymmetrically placed horizontal profiles, reminiscent of a shed that only partially reveals the inside, increasing curiosity about its contents. Designed as a cupboard for the dining area, thanks also to useful accessories such as the cutlery holder and the Eco Skin drawer bottom, or as a vitrine for precious objects.
