

# It's Not Just A Mat

🕒 October 8, 2018 👤 ODU Admin 📁 Camping & Hiking 💬 Comments Off

Mats to keep sand out of tents, RV's, cottages and for beach outings have been around for years. Here is one that really makes a difference!

The Sand-Free Mat from CGear was developed to be staked down into the earth permanently therefore well suited for R.V / outdoor living to replace ugly concrete slabs. The MAT has D-Rings positioned around it to firmly stake it to the earth. The best way to see how the MAT fits into your outdoor life is look at it as an extension to your tired ground sheet or canvas. Replace these with

the innovative sand-free ground sheet. The MAT has a dual layer weave which is resilient and developed to place picnic chairs and tables on a solid ground.

It comes in a host of sizes:

S	6' x 6' / 1.83m x 1.83m	3.15 lbs / 1.45 kgs
M	8' x 8' / 2.44m x 2.44m	5.55 lbs / 2.52 kgs
L	10' x 10' / 3.05m x 3.05m	8.5 lbs / 3.86 kgs
XL	12' x 12' / 3.66m x 3.66m	11.73 lbs / 5.33 kgs
