FROM THE FIELD TO THE FRONT YARD

Proven by the Pros

Common Products Used:

Training: For recovery and endurance during heavy workloads. Improves muscle and lung capacity to be able to sustain high drive and energy to get the most out the food you feed.

Mobility: Used to maintain maximum joint health by getting rid of inflammation in soft tissue areas from heavy work. Allows the dogs to bounce back day after day with fewer signs of stiffness and soreness.

Focus: Aids in calming the anxious dog to keep their focus on the handler and task at hand instead of distractions during training and events. Takes the edge off to handle a life with thunderstorms, doorbells, travel, and separation issues.

Used by amazing athletic and active dogs.

Common Products Used:

Immunity: Optimizes overall gut performance in order to fight off toxins, pathogens, and other harmful bacteria taken in daily through the nose, mouth and paws.

Mobility: Used to maintain maximum joint health by getting rid of inflammation in soft tissue areas from heavy work. Allows the dogs to bounce back day after day with fewer signs of stiffness and soreness.

Focus: Aids in calming the anxious dog. Takes the edge off to handle a life with thunderstorms, doorbells, travel, and separation issues.

Given daily to the dogs we love to play with, love on, and lounge around the house with.
