Limited Edition.

We've worked with many businesses this year who are choosing to put their money where their activism is, looking to ensure their gifting budget goes towards doing good. With this in mind we've created a limited edition star of the show for the holiday season; the Conscious Christmas Hamper.

Created using all of our client and recipient favourites, it's designed to bring a festive smile to everyone's face, full to the brim with high quality, delicious goodies. We've

included independent, social impact and female founded brands, all wrapped up in eco-friendly packaging, from shred to tape.

We're grateful to work with incredible entrepreneurs and makers and understand the huge impact that large scale orders can have on their businesses. Let's do good while we gift and shop consciously this Christmas.
