<b>Other:</b>			

Dear Client

Congratulations on taking the first step towards a healthier, happier you!

Over the next six months we will be working together to rid your body of irritants that cause suffering and pain, and providing it with what it needs for greater well-being.

Here are a few important things to remember before we get started:

- The first step is to fill out the meal diary for the first week and return it to your Consultant
- The completed diary will give you a detailed look at the foods you are currently eating
- Second step is to adjust your meal diary according to your test results
- Your Consultant will help you through this stage
- Your corrected meal diary will be your food list for the next 4 weeks
- Fill out your 4 week Progress Report as advised by your Consultant

ABN 2378649725609

The purpose of this test is to correct the underlying problem that is causing your symptoms. This is not an allergy or intolerance test. There are hundreds of components like fats, sugars and proteins that make up foods and it is impossible to accurately test for these individually as they appear in different combinations. **We test whole foods not individual components.** Locating “allergic” foods and removing them usually relieves symptoms, but often does not get at the cause. The situation is that some foods/products **cause** the symptoms while others **aggravate** the symptoms.

These aggravations are what people usually pick up on. The pain is usually severe and immediate. At this stage there is no technology that we are aware of that can separate these reactions.

---

## GETTING YOU STARTED

---

- Create your meal plan by writing down everything you eat and drink, right down to the brand names on the Meal Diary.
- Write down all the brand names of all the household products you are using. Your Consultant may ask you to replace any incompatible house hold products as you progress through the 6 month program. **The first stage is to focus on eating compatible foods only.**
- **At the end of the week, your Consultant will review your meal diary and correct it in line with your test results.** Any foods and drinks that you a have eaten that are not compatible (Red) will be replaced with compatible foods on your list. (Black)
- This corrected Meal Diary becomes your **list of allowable foods** for the first 4 weeks. During the first 4 weeks fill out the **4week Progress Report.** Your Consultant will use this information to advise you further, make changes as needed and introduce other therapies if required.
- The first 4 weeks we work at getting your food intake compatible with your body.
- If you are progressing well enough at 4 weeks that is all we need to do. If you are not progressing well enough we get more in depth with household items and may need to test extra items like skin care and make-up. Always check with your Consultant before making any changes

**GREEN VEGETABLES****Asparagus**

## 4 WEEK PROGRESS REPORT

This report allows you to monitor your progress while you are following the Bio-Compatibility Programme.

As time goes by it becomes increasingly difficult to recall exactly how you were feeling, but filling in this table will give you a tangible way to plot your recovery. This will keep you motivated to stick with the programme and help you see how your body is responding to the programme. You will also be able to tell with greater certainty whether your symptoms are easing. It only takes a few minutes at most each week, and you will be amazed at the results.

**Simply follow this quick two-step process:**  
**Step 1 - Mark the percentage by which you feel each symptom has improved (relative to the commencing the programme). Please bear in mind that some symptoms might get worse before they get better. If this happens, don't be discouraged — make a note of it and talk to your Consultant about any concerns you may have.**

**Step 2 - Return completed form to your Consultant to discuss these results at your next appointment.**

## Questions and Answers

---

### **How much hair is needed?**

Approximately ½ tsp cut from any part of the body. If no hair, use saliva on a cotton bud place in a plastic zip lock bag. (Babies)

### **Does it matter if my hair is coloured?**

No, the equipment is calibrated to suit each hair sample.

### **How does the equipment work?**

This equipment works on the electrical systems of the body. Every cell in the body requires electrical stimulation to function correctly. Incompatible foods and products can interfere with this electrical stimulation. All cells in creation have their own electro - magnetic signature. This electromagnetic field in the hair and the electromagnetic field of each food and product are brought together and either attract (COMPATIBLE) or repel (INCOMPATIBLE). The equipment is calibrated to a level which displays this on a computerized graph through a unique system of equipment and software.

### **How does this test differ from the Skin pricking and blood tests?**

Those tests relate to allergy type symptoms. Underlying allergy or allergic symptoms there is usually a compromised immune system. (Poor cellular function)

Bio-Compatibility testing is designed at a level where we test for foods and household products that compromise cellular function. Poor cellular function leads to inflammation which is involved in most disease states. The Bio-Compatibility test is testing at a much deeper level.

### **Is this an allergy test?**

**No**, this is a compatibility test which tests for food and products that are either incompatible or compatible with the individual.

### **What problems may I encounter when I start the program?**

On rare occasions it is possible to experience symptoms of elimination such as bad breath, coated tongue, excess mucous, gunk in the eyes etc. This depends on the level of toxicity associated with the condition. Skin conditions may get temporarily worse, skin being a large eliminatory organ. Always talk to your Consultant if any of these symptoms happen.

### **Why do I need to eliminate the food in red for 6 months?**

Excess inflammatory mediators in the bloodstream cause inflammation. Antibodies live for 3-90 days. To cover all scenarios and gain the maximum benefit for the client it is recommended a minimum of 6 months. Our experience has shown up to 75% improvement in symptoms at the 4 week stage is quite common. However there can be some tissue damage which the body needs more time to repair. This is why we recommend a minimum of 6 months on the programme and then retest. Some items will take longer depending on compliance, others may never correct depending on the amount of tissue damage.

### **Why can I only eat the foods remaining in Black on the list?**

Every food or product that is **not** on the list is assumed as being incompatible to the body unless individually tested. This applies to other brands as well.

**Eating as little as one incompatible item three times a week can slow down or stop the repair process.**

### **How do I reintroduce the foods that have been eliminated?**

There is a very strict procedure for reintroducing corrected items to help lower the risk of rebound. Reintroduction must be guided by your practitioner. We recommend retesting between 6 and 9 months. Full retest instructions are included in the Retest Report.

### **After 6 months the Retest still has some of the same foods plus a few extras ones. Why is this?**

The original sample is tested on symptomatic level (the red zone) which rates between 60-80 on our scale. Under 60 the item is incompatible. During the 6 months it is very possible for the items at borderline level to present in the red zone. If previous foods in red are now in black it is recommended to slowly reintroduce this food to avoid a rebound of this item. (See reintroducing food)

### **Is it necessary to get a retest?**

If you reintroduce a food that has not corrected, symptoms may return and often be much worse. There is a likelihood that this could undo all what has been gained on the program. Retesting is recommended between 6 and 9 months. We find that around 75% of incompatible items will correct at this point. Some will remain and may take up later on. There may be a few new ones. The new ones are added to your first list for another 4 weeks. After the 4 weeks we have a very strict protocol for reintroducing corrected items.

### **My retest has little improvement, why is this?**

Firstly improvement is very dependent on the instructions being followed very strictly for the full 6 months. Secondly it could mean the body just needs more time. At this stage other influences such as viruses, parasites, and heavy metals may present. The major plus of this test is it allows the body to heal in the order it wants to heal. For example the main symptom may be headaches and minor symptoms, bloating, constipation and muscle aches. While on this programme the body will determine which ailment improves first, therefore the headache may be the first to go or the last symptom to go. When we treat ourselves symptomatically like taking a Panadol for the headache, we will get temporally relief only because the underlying cause has not been addressed.

### **Is it normal for my symptoms to get worse?**

It is possible to experience elimination symptoms such as Bad breath, coated tongue, excess mucous, gunk in the eyes etc. This depends on the toxicity level associated with their condition. Skin conditions may get temporarily worse, skin being a large eliminatory organ.

### **How long before I see results?**

Usually symptom relief can occur in 3-10 days as the inflammation settles. By the end of 4 weeks the body is in repair process stage. Results may vary on the severity of symptoms.

### **How does eliminating the food change my condition?**

With this program we are getting as close as possible to the cause of the problem not just treating symptoms.

### **Why can I eat potatoes but not potato flour or White flour but not white bread?**

Processing and cooking changes the structure of the food. Synergism also plays a major part; for example White flour cooked with other ingredients may neutralize the reactivity. Whole foods are tested; this means foods are tested as you eat them. E.g. 28 different species of tomatoes raw and cooked are tested under the item tomato.

**Why can I eat commercial caged eggs but not organic eggs?**

The eggs composition will reflect what the hens are eating.

**Can I eat organic meat if meat comes up in red?**

No, organic meat is included in the meat test.

**Why am I feeling unwell when I eat chocolate yet it is in black on my list?**

It is possible the body is not digesting it well at this stage or elevating sugar levels. Mostly this situation corrects by the end of the program.

**Will this help me to lose weight?**

Some people do experience weight loss on this program. The program assists the body to detox/eliminate better.

**Can I get my baby tested?**

Yes the youngest baby we have tested was 2 days old.

We do have specific protocols for conception, pregnancy and babies. Refer to your Consultant.

**Can I have extra items tested?**

Yes. Ask your Consultant. A new hair sample will also be needed.

**My pet suffers a skin condition can I have it tested?**

Yes. We have a pet test list as well. Ask your Consultant for details.

**My wife is from another country and cooks different food to what is on your standard list. Do you have other food lists?**

Yes we have other lists including: United Kingdom, America, Dubai, Singapore/India, New Zealand. For your pets we have an Animal test.

**I suffer from Hayfever to dust and pollutants. How does eliminating food in my diet help this condition?**

Eating incompatible food can cause inflammation of mucus membranes including the membranes in the throat and nose. When inhaling dust, fuel, pollutants etc these irritate the already swollen sensitive mucus membrane which may lead to Hayfever/sinus symptoms. When the incompatible foods are removed it reduces the swelling therefore making the external environment more tolerable.

**What is Irritable Bowel Syndrome and how will this test help me?**

IBS is inflammation of the bowel. I like to refer to it as a rash on the inside. This program is focused on finding which food and products are causing the inflammation leading to IBS.

**I've tried a lot of different things to get rid of my skin rash and nothing has helped so far. How will this test help skin conditions?**

Inflammation is common to most skin conditions. Skin conditions can be caused by a compacted/constipated bowel. By improving elimination we are assisting the skin to repair.

This program is focused on finding which food and products are causing the inflammation

**I have eliminated dairy, processed foods, wheat and sugar products in the past and still felt unwell. How will this test help me?**

Often wheat, sugar and dairy aggravate symptoms. Eating incompatible food works collectively and we need to eliminate **them all** to be effective.

Eating one incompatible food a day is enough to cause inflammation and stop the repair process.

**Can you test makeup and skincare products?**

Yes. If you are not progressing well enough at the 4 week stage your Consultant can determine if further testing is necessary.

**Should I take supplements while I am on this program?**

Your Consultant will advise on which supplements you need.

I am feeling better can I come off my medications?

Seek advice from your prescribing practitioner before stopping or reducing supplements and medications.

What if I am eating other foods not on your list?

Every food or product that is not on the list is assumed as being incompatible to the body unless individually tested. Eating as little as one incompatible item three times a week can slow down or stop the repair process.

**Please Note**

**Anaphylaxis Allergies and Intolerances**  
**Substances known to have caused anaphylaxis or allergic reactions**  
**in the past must not be Re-introduced (even if they appear in Black). This test**  
**does not cover “Allergies or Intolerances”.**

**RESULTS**

As we are starting at a sub-clinical level, it can take time for some symptoms to disappear. Some people see symptom relief in a few days, while others have taken 6 – 8 weeks. It all depends on how compliant you are with your Consultant’s instructions and how much repair work has to be done. Compatible supplements, creams and medications may be prescribed to give symptomatic relief until the immune symptom corrects and deals with the problem.

Other factors (such as parasites, viruses, and heavy metals) can impact on the immune system as well and may have to be addressed. Ask your consultant.

**PROGRESS – RE-ASSESSMENT AFTER FOUR WEEKS ON YOUR PROGRAM**

At this stage your Consultant will be able to assess your progress, and you should be experiencing a good measure of symptom relief. If you are not progressing well enough at four weeks, your Consultant may look at other factors or simply give it more time for your body to repair and get you to fill out the 8 week Progress Report.

It takes a minimum of six months your body to repair. If there is tissue damage, supplements may be required to help in the repair process. In the case of severe tissue damage, it may take even longer.

*DISCLAIMER; This programme is not intended to be construed as medical advice, nor is it intended to lead anyone away from a qualified health practitioner. We make absolutely no claims to diagnose, cure, treat or prevent any disease. We cannot take any responsibility for those who may want to help themselves outside our instructions. If you have a medical condition, we urge you to be supervised by a qualified healthcare professional of your choice.*

# COMPATIBILITY RETEST VOUCHER

## Recommended between six and nine months

To gain the most benefit from your Bio-Compatibility Programme, it is important to retest **between six and nine months** from the time you started. This helps your Consultant to determine how your body is responding to your programme, and to determine if any further modifications or other therapies are necessary at this stage.

We have found that, on average, 75% of foods and household products will correct within 6 months, however, some items take longer. **If items are re-introduced too early, or too many at a time, there is a high risk that symptoms will return.** In addition to telling you which foods/ products can be re-introduced, your retest report provides important information about how and when to re-introduce these foods/ products.

Get the most from your efforts in the programme — **Contact your Consultant to order your retest before the date indicated below.**

*Clients, who submit their Retest Voucher before the expiry date receive a discount on their*
