

first of all, thanks so much for trying hiccapop. we know there are several other convertible crib safety rails out there, but hiccapop is truly a cut above the rest because we design all of our own products, control our own manufacturing, and build all of our products to last.

in fact, we are so confident in our quality that we offer a lifetime guarantee on all hiccapop products. just remember to register your product on hiccapop.com. so have fun, and please spread the word about hiccapop!

now, onto our shameless plug for reviews!

for us, amazon reviews are as important as sleep is to a new parent. if you love your hiccapop crib rail, please take a minute to write a review and help us spread some good hiccapop. we'd really appreciate it. to make it super easy, we are even emailing you a "product review link". thanks!

READ ALL INSTRUCTIONS BEFORE FIRST USE.

components (Figure A):

1. Curved Bar (2)
2. Mesh Cover (1)
3. Hinged Legs (2)
4. Lower Bar (2)
5. Leg Extension (2)
6. Anchor Clamps (2)
7. Wing Nut (2)
8. Thumbscrew (2)
9. Velcro Straps (2)

assembly instructions:

please rest assured that these instructions are very easy to follow and will help you assemble this rail very quickly.

01. Lay all pieces out on the floor or table. (Figure A)
02. Connect the 2 Curved Bars until they lock into place. (Figure B)
Make sure silver button protrudes from hole in bar when finished. (Figure C)
03. Insert assembled Curved Bar into Mesh Cover, leaving the ends of Curved Bar exposed. (Figure D)
04. Open Hinged Legs until hinges lock firmly into place. (Figure E)
05. Connect Hinged Legs to Curved Bar until they lock into place. (Figure F)
Make sure silver button protrudes from hole in bar when finished. (Figure C)
06. Slide Mesh Cover down toward each hinge. (see assembled below)
07. Connect the 2 Round Lower Bars until they lock into place. (Figure G)
Make sure silver button protrudes from hole in bar when finished. (Figure C)
08. Depress silver button on plastic slide-lock end of the Lower Bar (Figure G) and slide this section into the "UNLOCK" position.
09. Insert "V" grooved end of assembled Lower Bar (Figure G) into the lower sleeve of the Mesh Cover (see assembled photo below) matching the "V" end of the bar with the "V" end at the base of the Hinged Leg. Press firmly into place. (Figure H)
10. Align the plastic slide-lock end of the Lower Bar to the fitting on remaining Hinged Leg and slide locking sleeve over the fitting until the spring-loaded button snaps firmly into place. (Figures I and J)
11. Connect a Leg Extension to the end of each of the Hinged Legs until they lock into place. (Figure K) Make sure silver button protrudes from hole in bar when finished. (Figure C)

installation and use instructions for convertible cribs

01. Remove mattress from crib.
02. Remove the Anchor Clamps from the ends of the 2 Leg Extensions, unscrewing the Wing Nuts from the Thumbscrews.
03. Place assembled crib rail in center of mattress platform.
04. Place Anchor Clamps over the outside frame of mattress platform (opposite side of crib rail), lining each up with a corresponding Leg Extension. (Figure L)
05. Slide the 2 Leg Extensions into their corresponding Anchor Clamps, aligning holes of Anchor Clamps with those at ends of Leg Extensions. (Figure L)
06. Insert Thumbscrews in holes (from top) and hand tighten Wing Nuts onto bottom. (Figure M) NOTE: It is even quicker and easier if you use a Phillips head screwdriver to help tighten the Thumbscrews.
07. For maximum stability, optional Velcro Straps may be used to attach Lower Bar to the frame of mattress platform. (Figure N)
08. Crib rail is now installed. Place mattress back onto mattress platform.

installation and use instructions for convertible cribs with bunky board

01. Remove mattress from crib.
02. Remove the Anchor Clamps from the ends of the 2 Leg Extensions, unscrewing the Wing Nuts from the Thumbscrews.
03. Place assembled crib rail in center of bunky board (mattress platform) and align flush to the front edge, where the mattress will be.
04. At any one of the holes in the Leg Extensions, use a 3/16" drill bit and drill through board. (Figure O)
05. Insert Thumbscrews in holes (from top), pass through the board, and tighten Wing Nuts onto bottom. (Figure P) NOTE: It is even quicker and easier if you use a Phillips head screwdriver to help tighten the Thumbscrews.
06. Your crib rail is now installed; place mattress back onto mattress platform.

lowering crib rail after installed on convertible crib

this crib rail is designed with childproof hinges for added safety. therefore – to lower your crib rail - you must raise each (both left and right) spring-loaded hinge at the same time. once each spring is raised, you may gently lower the rail with ease. this will allow you to easily change or make the crib. when you raise the crib rail back to the upright position, the locks will automatically pop back into place for safety.

cleaning instructions:

machine wash cold and hang dry, or surface wash with damp cloth.

rest easy
