

product instructions

instructions (even ours) can be boring, but they are required by “big brother.” at least they are short:

your bumper arrives ready-to-go; unroll it, inflate it and zip it up. that’s it! we even use a patented valve for quicker inflation/deflation. just make sure you firmly re-insert the plug after inflating. now you can install it.

ok... this seems obvious... but install this “under” the fitted bottom sheet – near the edge of the bed. smoothly spread out the (moon shaped) safety-flap over the mattress and tuck in the bottom sheet. your child’s weight on this flap helps hold the bumper in place during sleep.

install the top sheet and you are ready to go. note: if using for home/grandma’s, use a deep-fitted bottom sheet because it will give you a little more room for the bumper. hotels generally already provide such sheets.

storing

deflate and roll tightly. we’ve even included a cool travel bag.

washing

remove inflatable bumper from cover and wash cover just as you would any other garment.

final word

we hope you and your child love your new bumper. if so... please tell your friends about hiccapop, as word of mouth carries more weight than even the best advertising these days.

sleep safe...

love hiccapop
