

## READ AND SAVE THESE INSTRUCTIONS

sorry for the following instructions which are way too long and more than incredibly boring...but...they are required by law. so our hands are once again tied by big bro'.

### IMPORTANT SAFETY INSTRUCTIONS

when using an electrical unit, basic precautions should always be followed, including the following:

**DANGER** - to reduce the risk of electric shock:

1. always unplug this unit from the electrical outlet before cleaning.
2. this unit is a household inflator/deflator to be used with airbeds, inflatable toys, etc.
3. this unit is not intended for continuous use. prolonged operation (over 20 minutes) could cause overheating and damage to the unit. after 20 minutes of use, allow unit to rest for 10 minutes before further use.

**CAUTION** - to reduce the risk of electric shock, do not expose to rain. store indoors.  
household use only!

**WARNING** - to reduce the risk of fire or electric shock, do not use this air pump with any solid state speed control device.

**WARNING** - to reduce the risk of burns, fire, electric shock, or injury to persons:

1. unplug from outlet before attaching or removing parts.
2. use this unit only for its intended use as described in these instructions. do not use attachments not recommended by hiccapop.
3. never operate this unit if the cord or plug is damaged, if the unit is not working properly, or if the unit has been dropped, damaged or exposed to water. return the unit to a service center for examination and repair.
4. keep the cord away from heated surfaces.
5. never operate the unit with the air openings blocked. keep the air openings free of lint, hair, and other debris.

6. never drop or insert any object into any opening.
7. do not use outdoors.
8. to disconnect, turn control to the off position, then remove plug from outlet.
9. do not use the pump in wet environment or conditions.
10. this unit has a polarized plug (one blade is wider than the other). this plug will only fit into a polarized outlet one way. if the plug does not fit properly into the outlet, reverse the plug. if it still does not fit, contact a qualified electrician to install the proper outlet. do not alter the plug in any way.
11. keep this air pump away from children. small fingers may fit into inflation/deflation ports and cause serious injury.
12. carefully follow the instructions of items being inflated. never exceed recommended pressures or over-inflate. doing so may result in the item rupturing, possibly causing serious injury to yourself or others in the vicinity.
13. never leave pump unattended while in use.
14. do not attempt to repair or replace internal parts.
15. never use pump in an area where sand, small rocks, twigs or other debris could be sucked into inflation/deflation ports.
16. we now want to see if anyone has read this. so, if you have suffered through this, please email us at [info@hiccapop.com](mailto:info@hiccapop.com) and simply put #BoringButReadIt in the subject line, and we will send you a 50% off coupon for any hiccapop product. we have some expensive stuff...so this is a great deal! and assuming you like your new purchase...please give us a great review because we live off those things. now if you hate your new purchase, just remember, you got it 50% off!

## cleaning

1. always unplug the unit from outlet before cleaning.
2. wipe the outside surface of the unit with a dry cloth only.
3. never immerse the unit, plug or cord in water or any other liquid.

## to inflate items

1. plug unit into household 120v ac outlet.
2. choose your preferred adapter size and fit it securely over the inflation outlet. it will snap into place when properly secured.
3. hold pump against inflation valve on item to be inflated and activate the switch.
4. unplug the unit when not in use.

## to deflate items

1. frankly, we don't like using our pump to deflate items because it is usually quicker to just unplug your item and push the air out. but if you want to, just take your preferred adapter and snap it onto the top of the unit and it will suck the air out. but we wouldn't hassle with this. it's easier to just open the valve on your inflatable.

that's it. you've now been told how to use something that is as simple to use as bouncing a ball, but which the government fears could kill you if you don't read instructions that are as dry as the desert.

and as usual, if you have any problems or suggestions or questions or complaints, or you just want to say "hey...awesome pump", we'd love to hear from you at [info@hiccapop.com](mailto:info@hiccapop.com). unless it's some weird hour, we generally get back to our customers pretty quickly.

happy pumping...hiccapop
