

Please read these instructions fully before using this product.

**SAFETY INFORMATION**

Please use your UberBoost in accordance with all the instructions and guidance listed in the instruction book and labels on the product. Failure to adhere to our warnings, and misuse of the product, may be dangerous to your child. Bodily harm may ensue with failure to follow our directions and warnings.

**⚠ WARNING!**

Leave the UberBoost restrained and secured while it is in your car, even if it is unoccupied. In a crash, an unrestrained child booster seat may injure other occupants.

**⚠ WARNING!**

Use only the vehicle's lap and shoulder belt system when restraining the child in this booster seat.

**⚠ WARNING!**

This restraint is not certified for aircraft use because we have not designed nor tested it for such usage.

**It's important to register your UberBoost!**

Child restraints could be recalled for safety reasons. You must register this restraint to be reached in a recall.

Send your name, address, e-mail address if available, and the restraint's model number and manufacturing date to

hiccapop  
160 alamo plaza  
unit 590  
alamo, ca 94507

or call 1-833-442-2266.

For recall information, call the U.S. Government's Vehicle Safety Hotline at

1-888-327-4236 (TTY: 1-800-424-9153)  
or go to: <http://www.NHTSA.gov>.

**UberBoost**  
inflatable car seat booster

INSTRUCTION MANUAL

Manufacturer recommends use by children 40-110 lbs, and 38-62 inches tall.

front

**Where to Use Your UberBoost**

This product can be used in all standard cars. **DO NOT USE IN A REAR-FACING FASHION.** This unit is only to be used in front-facing applications. Use only with type II seat belts, which are seat belts that have both a lap AND torso component. We do NOT recommend using the UberBoost in conjunction with type I (i.e. lap-only) seat belts.

**STEP 1**

Unzip the cover of your UberBoost to find the air valve.  
Fully blow up the unit.

inside spread left panel

**STEP 2**

Zip up cover, and place the UberBoost in the car's seat.

Place your child on the UberBoost.

**STEP 3**

Feed the lap belt through the guides on the left and right of the UberBoost.

**NOTE:** A snug strap should not allow any slack. It lies in a relatively straight line without sagging. It does not press on the child's flesh or push the child's body into an unnatural position.

inside spread center panel

**STEP 4**

When installed correctly, your seated child should look like the diagram on the right.

According to accident statistics, children are safer when properly restrained in the rear seating positions than in the front seating positions.

**HINT:** We suggest keeping these instructions with your UberBoost for future reference. To store your instructions, unzip your cover, place them next to the inflatable bladder, and zip the cover back up.
