

# product instructions

## assembly

instructions (even ours) can be boring, so we've tried to keep them short:

1. remove from bag and unfold firmly into place. you are now 95% there.
2. for increased stability (perhaps you are out at a park)... install our "duck-feet". they slide over the normal feet and help prevent tip-overs... like those that often happen when your Great Dane decides to sit in your baby's lap at lunchtime.
3. to attach the tray, simply drop it into place over the small mushroom heads on either side of the chair arms. insure it is then firmly locked down. to fully remove or swivel the tray, pull out one or both of the side levers, and you are good to go.

**#hiccafact** babies burp because they are uncomfortable. but did you know baby gorillas burp because they are happy? Amelia (one of our younger gen z'ers at hiccapop) recently told us that and we thought it was pretty cool.

## washing

- a. remove the tray.
- b. depress the buttons on the side of the small mushroom disks that snap into the tray, and remove them from the tubing.
- c. slide off the cover.
- d. wash and dry it normally.

**DANGER WILL ROBINSON!** (yes, we are "Lost In Space" geeks): to avoid disintegration... **AVOID THE BLEACH!**

## final word

we hope you love your OmniBoost as much as we loved designing it. lots of hours (and caffeine) were put into its design, and we are incredibly proud of it. look for more things to come soon, and please, if you like hiccapop – spread the word. but if you don't like us... please forget we said anything.

peace, joy, tranquility

**love hiccapop**
