

product instructions

instructions (even ours) can be boring, but they are required by “big brother.” at least they’re short:

your wipes dispenser is super easy to use.

look inside and you will find a weighted plate. it’s designed to hold your wipes down so that only one wipe comes out at a time. play with it; it works really smoothly.

our lid features a one-hand design and a silicone seal to hold in moisture... so you really never should have to add water. but we do like adding some lavender oil-scented water once in a while... makes things smell overall a bit better... if you know what we mean!

cleaning

wipe it down however you want. that’s it.
simple huh?

final word

we hope you love your new dispenser, because hiccapop is all about making parenting just a little easier. if you do love it, please tell your friends, as word of mouth carries more weight than even the best advertising these days.

peace, joy, tranquility
love hiccapop
