

# Lioness Nail Polish Recipe

Makes 1 x 15ml Bottle

The Lioness nail polish offers a unique, bright burnt orange colour. This polish is created with various cosmetic colourants combined with our lustre nail polish base. The lustre nail polish base suspends the colourant throughout the bottle without any separation or settling. This base is vegan, cruelty-free and 10-free.

## Recommended Equipment:

- Scale
- Plastic Mixing Cups
- Stir sticks or toothpicks.
- 0.15cc plastic scoops
- Stainless Steel Mixing Balls

## Ingredients:

- 15g Lustre Nail Polish Base
- 2 x 0.15cc scoops of Iron Oxide Yellow
- 1 x 0.15cc scoop of Cotton Candy Mica
- 1 x 0.15cc scoop of Crimson Heart Mica
- 3 x 0.15cc scoops of 24 Karat Gold Mica

*Note: Iron oxides tend to require a bit more work to combine than mica and glitter so be sure to mix very well to break down any chunks that may form.*

*Note: Nail polish will stain clothes, surfaces, and skin. Ensure your workspace and clothes are protected to prevent unwanted stains.*

## To make the polish:

1. Weigh out your nail polish base into a plastic mixing cup.
2. Add the mica and iron oxide to the base and stir gently to thoroughly combine.
3. Carefully pour into a 15ml glass nail polish bottle, tighten the lid, and shake for a few seconds.
4. Add a few Stainless Steel Mixing Balls into your bottle to better mix your DIY custom nail polishes.

And that is it! Your nail polish is ready to use right away. For full, even, coverage apply 2 – 3 thin layers to the nail and finish with our clear coat nail polish base for a vegan, cruelty-free, 10-free topcoat.
