

For optimistic drinkers
& half full thinkers.

Hand-blown glass cups and bottles, unlike anything you've ever used.

We are for ending waste and embracing taste. Happy, healthy, sustainable and beautiful, we've designed our hand-blown reusable cups and bottles using materials that keep the heat in and the nasties out.

We are the healthier choice – for you, and for the environment.

SoL: Good for the soul.

About one third of waste disposal facilities are made up of packaging materials, and each year in Australia over one billion takeaway coffee cups are produced and disposed of. Unfortunately, disposable coffee cups with a film of polyethylene are not recyclable, and release methane gas when sent to landfill.

We designed SoL Cups to help people move from a throwaway mindset to a more environmentally supportive one, so we can all be kind to the world around us.

Why glass?

Glass is made from naturally abundant materials – namely sand – meaning no unnecessary chemicals are added in the production process. Glass is also far less permeable than plastics, meaning it won't absorb residual tastes, odours or germs, and won't leach chemicals (known to be endocrine disruptors in the body) into your beverage. As a result, SoL Cups offer purity of taste – your drink is fresher, cleaner and better for you.

The SoL signature sleeve.

Our thermal silicone sleeves keep your fingers cool and your drink at the perfect temperature. They come in a range of eight distinctive colours to suit your personality, and are food-grade quality and BPA- free, just like our glass - so they're non-toxic.

SoL Cups' signature silicone sleeves can also be personalised for your business. SoL Cups are the perfect way to align your brand with your consumers' values, and this repeated exposure becomes an amazing brand-awareness opportunity for you - as well as a positive experience for your consumer.

They're portable, convenient, aesthetically pleasing, and infinitely reusable. Choose from our range of colours and keep an eye out for our limited editions!
