01

Mixer body

Rubber washer

Mounting washer
Locking nut

Disassemble the locking nut, mounting washer and rubber washer from the mixer body in turn.

02

Lift nut

Knitted hose(red)
Upper lift rod

Lower lift rod
Knitted hose(blue)

Connect the upper lift rod with the lower lift rod.Insert the lift nut into the slot on the back of the mixer body and connect it with the upper lift rod. Screw the knitted hose with red(hot) in front and bule(cold) in back.

03
Counter top

Pass the mixer body through the counter top, install the rubber washer and the mounting washer. Tighten them with the locking nut.

04

Waste set   Knitted hose(red)

Knitted hose(blue)

Cold water triangle valve

Hot water triangle valve
Connect the two knitted hoses to the two triangle valves (Red for hot water and blue for cold water). Connect the lower lift rod to the waste set.

05
Run the water to check if the product is well installed.

06

Flow straightener

Filter

Mounting board

M3 screw

If the flow rate gradually decreases after sometime, it usually results from poor water quality leading to blockage of the filter. Please clean the filter as shown in figure above: Turn off the handle, unscrew the M3 screw with the S2 spanner, take off the mounting board, the flow straightener and the filterin turn, wash the filter and then install them back.
