

## WHAT IS BAD AXE PARTICULATE CONQUEROR?

Bad Axe™ Particulate Conqueror is a mild blend of uniquely charged surfactants used as a cleaning aid. It is designed for use in remediation, demolition, and water- and fire-restoration cleanup of residential and commercial properties.

## HOW IT WORKS:

Bad Axe Particulate Conqueror surrounds airborne and surface-borne particulate debris, immobilizing them on surfaces to be cleaned before, during and/or after a remedial procedure. This results in contamination control of the work place and adjoining spaces. Use Bad Axe Particulate Conqueror to enhance your remedial process and improve air sampling results.

## USAGE INSTRUCTIONS:

Dilute Bad Axe Particulate Conqueror: 16 ounces per gallon of water. Fog or mist into air and, on surfaces following the establishment of containment and after appropriate engineering measures are in place. Allow to dry, then vacuum surfaces with a HEPA-filtered vacuum. Run HEPA-filtered air scrubbers for a period consistent with industry standards.

## ADDITIONAL INFORMATION:

Always use proper PPE and approved respiratory protection during any project. Allow product to tack before demo, source removal or testing. Re-apply as often as needed to control airborne particulate. Clean fogging or misting equipment with warm water. Bad Axe Particulate Conqueror contains no heavy metals, no fragrances, is non-reactive, VOC compliant, and corrosion- and abrasion-resistant.
