

Membrane Filtration Media

Hach's membrane filtration (MF) media is formulated specifically for use with membrane filtration methods, though some may be usable in other scenarios. Hach's best-selling and innovative mColiBlue24 broth and total prepared media (simultaneous results for total coliforms and *E.Coli.*), other prepared agar plates, broths in tubes, bottles, and ampules are all available. Media types include m-TGE, m-FC m-Endo, m-TEC, brilliant green, m-Green, A-1, m-HPC, nutrients w/MUG, R2A, tryptic soy, and others. Applications include drinking water, wastewater, beverage, surface, ground, and well water.
