

PARISSA STRIP FREE HOT WAX

Parissa Hot Wax is a no-strip salon strength wax hair remover that's perfect for gently lifting away short, coarse hair in sensitive skin areas.

Ingredients (Common)

Gum Rosin, Beeswax, Canola Oil, Chamomile

Gum Rosin

Sticky substances derived from the pine tree.

Beeswax

A natural wax that is firm at room temperature.

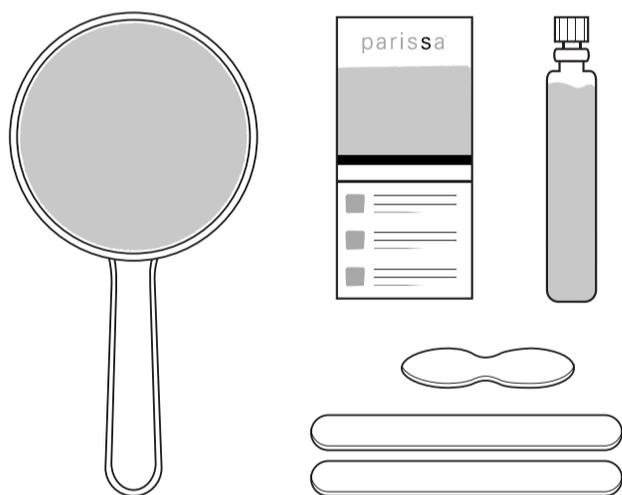

Azulene

The active ingredient in Chamomile.

Ingredients (INCI)

Collophonium, Cera Alba, Brassica Napus, Azulene

Kit Contains

- 1 120g / 4oz Wax
- 2 Photo Instructions
- 3 8ml Azulene Oil
- 4 3 Wooden Spatulas

Why We Love Hot Wax:

- ✓ **Bikini & Brazilian**
Professional style wax for bikini & Brazilian waxing, works on short coarse hair.
- ✓ **Strip Free**
No fabric strips are needed. This wax firms as it cools and the wax becomes the strip.
- ✓ **Sensitive Skin**
Beeswax makes this wax ideal for sensitive skin areas, face and underarms.

Why We Love Waxing:

- ✓ **Long Lasting Smoothness**
Waxing means skin stays smooth for weeks longer than shaving.
- ✓ **Softer Re-growth**
When hair is lifted from the root, regrowth becomes softer and sparser over time.
- ✓ **Natural Ingredients**
Made with safe and gentle ingredients from natural origins.

INSTRUCTION SHEET

Before Waxing

Wait! Before you start, do a patch test.

When using new beauty products always test for allergies. How? Apply a small amount of wax to your skin, wait 24 hours. If no redness or irritation occurs it's OK to go ahead and use the product.

General waxing tips Parissa Salon waxes (Resin Based)

- i** Do not bathe, wash or clean skin before waxing.
- i** The skin's natural oils provide a buffer between wax and skin.
- i** Sparingly applying some talc (soft) powder to the area is an option, this can help keep the skin dry in warmer weather.
- i** Don't wax over the same area more than once during a single waxing session.
- i** Previously shaved hair can be stubbly and resistant. Wait for at least two weeks hair growth ($\frac{1}{2}$ cm or $\frac{1}{4}$ "") before waxing.
- i** Avoid waxing before or after strenuous exercise.
- i** Remove any wax left on skin with the Azulene aftercare oil included in the kit (or other gentle oils such as baby oil or mineral oil).

Warm the wax gently, think liquid honey.

Two warming options below:

- 1** Parissa Wax Warmer
Place on warmer (sold separately) for 30 minutes.
- 2** Stove Top
Carefully heat wax in its pan on low heat, until about half has melted. Remove from heat and mix with spatula until a thick honey consistency is reached.

- !** Warnings: Always test the temperature of the wax before applying to skin. Do not leave the wax unattended on heat or open flames. Boiling or spillage may cause fire. Wax, pan and handle may be very hot.

Waxing

How To Use Parissa Hot Wax

- 1** Smooth on a fairly thick layer of wax, in the opposite direction of hair growth.
- 2** Leave the wax thicker and rounded at the edges for easier removal.
- 3** Let the wax cool, until the surface is no longer tacky to the touch. Don't let the wax harden completely.
- 4** While keeping skin taut, peel off quickly. Start lifting the outer edge and then peel off in the opposite direction of hair growth.

Speed & technique are key for best results.

Use the spatulas provided to apply the wax. After dipping spatula into wax, wipe wax off one side of the spatula against the pan rim. This helps to control any wax drips. Always remove wax quickly and in one motion. Keep the skin taut while removing the strip, this avoids movement of the skin and helps reduce discomfort.

INSTRUCTION SHEET

After Waxing

Clean any excess wax remaining on the skin with Azulene Oil.

Other gentle oils such as baby oil or mineral oil will also work just fine to clean away wax. Parissa salon waxes (Resin Based) will not clean away with water, they are oil soluble.

Some redness after waxing is normal.

Most people experience some level of temporary pinkness or redness to the skin after waxing. Depending on the area waxed and the hair type this should disappear in 20 minutes to a few hours. If irritation and redness persists, discontinue use. High skin sensitivity may occur after first use, but can decrease with each waxing session as the hair grows back sparser, finer and weaker.

Waxing Tips by Body Area

1 Bikini line

If the hair is longer in this area, trim down to around 1/2" (1cm). Keep the skin taut as possible, and work in small areas.

2 Brazilian

This is only recommended for experienced waxers. Email Parissa hello@parissa.com for a complete Brazilian waxing guide.

3 Upper Lip

Keep lips taut over teeth throughout process. Work on only half of the area at a time. Smooth on strip from centre to corner & zip-off towards centre in one quick motion.

4 Underarm

Place arm behind head as far back as possible to keep skin taut. Check direction of hair growth as it varies, work in small areas.

FAQS

How long will I stay smooth for?

Regrowth time varies from person to person. But expect hair regrowth anytime from 2 to 6 weeks after waxing. Over time the hair grows back more slowly as well as sparser and finer.

What is Azulene oil for?

Applying Azulene oil daily will moisturize your skin and help to prevent ingrown hair. Parissa Azulene Oil is extracted from the plant known as Chamomile. It is used as an after care oil for hair removal waxing as it has antiseptic and anti-inflammatory properties. The unique colour blue is from a compound called Azulene, this is mostly found within the essential oil of plants from the Asteraceae family (i.e. Chamomile). A larger bottle of Parissa Azulene Oil is sold separately, with an easy application spray head.

How do I prevent ingrown hairs?

Regular exfoliation also helps prevent ingrown hairs. Wait at least 24 hours after waxing before starting exfoliation. Parissa Exfoliating Gloves are sold separately and can be used in the bath or shower.

Warnings: Always Follow Parissa's Waxing Instructions.

- ⚠ Improper use of waxes can cause skin lifting, bruising or skin irritation. If in doubt, contact Parissa before waxing for extra instructions or advice.
- ⚠ Do not wax sensitive, sunburned, irritated, broken or injured skin.
- ⚠ Avoid waxing over varicose veins, moles, warts or other skin irregularities.
- ⚠ Do not use alcohol or astringents before or after waxing.
- ⚠ Do not use beauty or cosmetic products on the skin immediately after waxing.
- ⚠ Do not use deodorants or antiperspirants for 24 hours after underarm waxing.
- ⚠ Do not wax skin treated with vitamin A derivatives such as Retin A, Isotretinoin (Accutane) or Glycolic Acid or Alpha Hydroxy Acid products.
- ⚠ Do not sunbathe before or after waxing.
