- 5 3 Wooden Spatulas

Why We Love Sugar Waxes:

- ✓ Washable Formula Wax
This sugar based wax cleans away easily with water.
- ✓ Soothing Chamomile
Contains Chamomile extracts which acts to soothe the skin.
- ✓ Safe for Sensitive Skin
This sugar wax formula is safe and gentle on sensitive skin.

Why We Love Waxing:

- ✓ Long Lasting Smoothness
Waxing means skin stays smooth for weeks longer than shaving.
- ✓ Softer Re-growth
When hair is lifted from the root, regrowth becomes softer and sparser over time.
- ✓ Natural Ingredients
Made with safe and gentle ingredients from natural origins.

Where to use? Legs, Body & Face

How to clean wax? Water & Soap

INSTRUCTION SHEET

Before Waxing

Wait! Before you start, do a patch test.

When using new beauty products always test for allergies. How? Apply a small amount of wax to your skin and wait 24 hours. If no redness or irritation occurs it's OK to go ahead and use the product.

General waxing tips Parissa Washable waxes (Sugar Waxes)

- i** Don't wax over the same area more than once during a single waxing session.
- i** Wash your skin with soap and water, or an oil-free toner, dry well.
- i** Previously shaved hair can be stubbly and resistant. Wait for at least two weeks hair growth ($\frac{1}{2}$ cm or $\frac{1}{4}$ ") before waxing.
- i** Avoid waxing before or after strenuous exercise.

Warm the wax gently, think liquid honey.

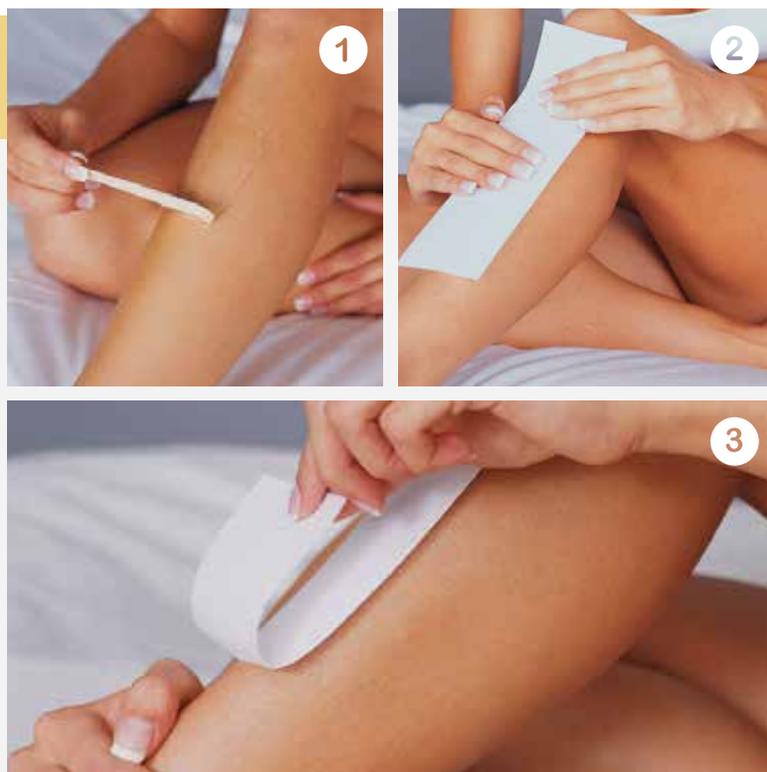

Warm the wax gently, this helps in applying a nice thin layer of wax. Three warming options below:

- 1** Microwave
Place in microwave for 20 seconds.
- 2** Reading Lamp
Place directly under reading lamp for 20 minutes.
- 3** Parissa Wax Warmer
Place on warmer (sold separately) for 20 minutes.

Waxing

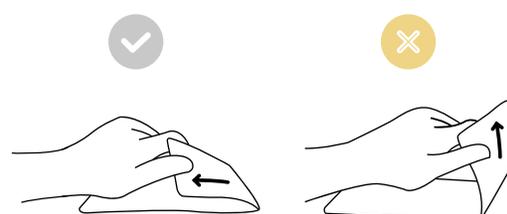

How To Use Parissa Chamomile Body Sugar

- 1** Apply a paper thin layer of wax, in direction of hair growth. Use the spatula provided.
- 2** Firmly press on fabric strip, in the direction of hair growth.
- 3** While keeping skin taut, zip away strip in opposite direction of hair growth.

Speed & technique are key for best results.

Applying a thin layer of wax is essential to achieving the best results. Speed is important in the fabric strip removal. Always remove strips quickly and in one motion. Never pull straight up, pull backwards and stay close and in parallel to the skin as this helps reduce discomfort.

INSTRUCTION SHEET

After Waxing

Clean any excess wax remaining on the skin with warm water and soap.

Parissa Washable waxes (Sugar Based) can be clean away easily with warm water and soap.

Some redness after waxing is normal.

Most people experience some level of temporary pinkness or redness to the skin after waxing. Depending on the area waxed and the hair type this should disappear in 20 minutes to a few hours. If irritation and redness persists, discontinue use. The skin may be more sensitive after the first waxing session, as the hairs are more deeply rooted. However this can improve with each waxing session as the hair grows back sparser, finer and weaker each time.

FAQS

How long will I stay smooth for?

Regrowth time varies from person to person. But expect hair regrowth anytime from 2 to 6 weeks after waxing. Over time the hair grows back more slowly as well as sparser and finer.

How do I store remaining sugar wax?

It is important to tightly seal the wax container after use. Store in a dry place at room temperature.

Can I use strips & spatulas again?

Yes, but this only applies to Parissa Washable waxes (Sugar Based). Rinse the fabric strips with warm water and hang to dry. The spatulas can also be cleaned and reused.

How do I prevent ingrown hairs?

Regular exfoliation also helps prevent ingrown hairs. Wait at least 24 hours after waxing before starting exfoliation. Parissa Exfoliating Gloves are sold separately and can be used in the bath or shower.

What is Azulene oil for?

Applying Azulene oil daily will moisturize your skin and help to prevent ingrown hair. Parissa Azulene Oil is extracted from the plant known as Chamomile. It is used as an after care oil for hair removal waxing as it has antiseptic and anti-inflammatory properties. The unique colour blue is from a compound called Azulene, this is mostly found within the essential oil of plants from the Asteraceae family (i.e. Chamomile). A larger bottle of Parissa Azulene Oil is sold separately, with an easy application spray head.

How do I prevent ingrown hairs?

Regular exfoliation also helps prevent ingrown hairs. Wait at least 24 hours after waxing before starting exfoliation. Parissa Exfoliating Gloves are sold separately and can be used in the bath or shower.

Warnings: Always Follow Parissa's Waxing Instructions.

- ! Improper use of waxes can cause skin lifting, bruising or skin irritation. If in doubt, contact Parissa before waxing for extra instructions or advice.
- ! Do not wax sensitive, sunburned, irritated, broken or injured skin.
- ! Avoid waxing over varicose veins, moles, warts or other skin irregularities.
- ! Do not use alcohol, astringents or other irritating products on the skin before or after waxing.
- ! Do not use beauty or cosmetic products on the skin immediately after waxing.
- ! Do not use deodorants or antiperspirants for 24 hours after underarm waxing.
- ! Do not wax skin treated with vitamin A derivatives such as Retin A, Isotretinoin (Accutane) or Glycolic Acid or Alpha Hydroxy Acid products.
- ! Do not sunbathe before or after waxing.
