

PARISSA PRECISION WAXING PEN

A precision wax applicator pen filled with salon wax. Perfect for accurate placement of wax for expert brow shaping & facial hair removal. Mess free & Fragrance free.

Ingredients (Common)

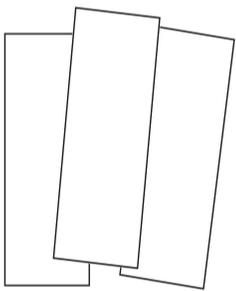

Collophonium
& Gum Rosin

Sap or sticky substance from Spruce and Pine trees.

Ingredients (INCI)

Triethylene Glycol Rosinate, Glyceryl rosinate

Kit Contains

- 1 Waxing Pen filled with 4 ml Salon Wax
- 2 20 Mini Fabric Strips
- 3 Photo Instructions
- 4 8ml Azulene Oil

Why we love the Waxing Pen:

- ✓ **Accurate Brow Shaping**
Precision applicator makes shaping brows a breeze.
- ✓ **Salon Style Wax**
The pen contains effective salon wax, effective even on short coarse hairs.
- ✓ **Easy Application**
Mess free, simple and easy to wax the small brow area.
- ✓ **Gentle Warming**
Only gentle warming required for perfect wax application.

Why we love Waxing:

- ✓ **Long Lasting Smoothness**
Waxing means skin stays smooth for weeks longer than shaving.
- ✓ **Softer Re-growth**
When hair is lifted from the root, regrowth becomes softer and sparser over time.
- ✓ **Natural Ingredients**
Made with safe and gentle ingredients from natural origins.

INSTRUCTION SHEET

Before Waxing

Wait! Before you start, do a patch test.

When using new beauty products always test for allergies. How? Apply a small amount of wax to your skin, wait 24 hours. If no redness or irritation occurs it's OK to go ahead and use the product.

General waxing tips Parissa Salon waxes (Resin Based)

- i** Do not bathe, wash or clean skin before waxing.
- i** The skin's natural oils provide a buffer between wax and skin.
- i** Sparingly applying some talc (soft) powder to the area is an option, this can help keep the skin dry in warmer weather.
- i** Don't wax over the same area more than once during a single waxing session.
- i** Previously shaved hair can be stubbly and resistant. Wait for at least two weeks hair growth 3-5 mm (1/8 - 1/5 inches) before waxing.
- i** Avoid waxing before or after strenuous exercise.
- i** Remove any wax left on skin with the Azulene aftercare oil included in the kit (or other gentle oils such as baby oil or mineral oil).

Hair needs to be at least 3-5 mm (1/8 - 1/5 inches) long.

Gently warm the Waxing Pen for 1 minute. Do not use in microwave.

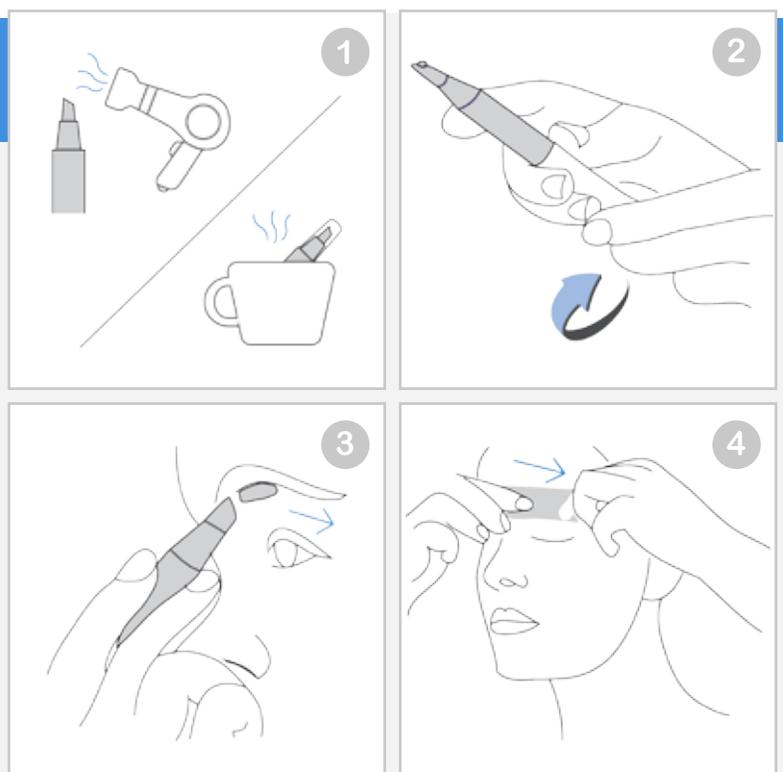

Two warming options below:

- 1** Cup of Hot Water
Place the Waxing Pen with tip facing up in a cup of hot water.
- 2** Hair Dryer
Warm gently with your hair dryer.

Waxing

How To Use Parissa Waxing Pen

- 1** Gently warm the waxing pen.
- 2** Remove cap & slowly twist the wax pen. Try 20 'clicks' to start. Only a tiny drop of wax is needed.
- 3** Apply wax in direction of hair growth.
- 4** Hold skin taut as skin can be mobile. Push firmly to ensure a thin, even layer.

Speed & technique are key for best results.

Always remove strips quickly and in one motion. Never pull straight up, pull backwards and stay close and in parallel the skin as this helps reduce discomfort. Skin around the eye area can be mobile, be sure to hold skin tightly when removing the strip.

INSTRUCTION SHEET

After Waxing

Clean any excess wax remaining on the skin with Azuelene Oil.

Other gentle oils such as baby oil or mineral oil will also work just fine to clean away wax. Parissa salon waxes (Resin Based) will not clean away with water, they are oil soluble.

Some redness after waxing is normal.

Most people experience some level of temporary pinkness or redness to the skin after waxing. Depending on the area waxed and the hair type this should disappear in 20 minutes to a few hours. If irritation and redness persists, discontinue use. High skin sensitivity may occur after first use, but can decrease with each waxing session as the hair grows back sparser, finer and weaker.

Waxing Tips by Body Area

1 Brows

If the hair is longer in this area, trim down to around 1/2" (1cm). Keep the skin taut as possible, and work in small areas.

2 Upper lip & Face

Keep lips taut over teeth throughout process. Work on only half of the area at a time. Smooth on strip from centre to corner & zip-off towards centre in one quick motion.

FAQS

How long will I stay smooth for?

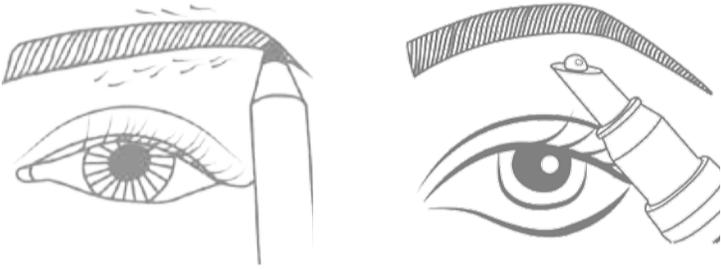

Regrowth time varies from person to person. But expect hair regrowth anytime from 2 to 6 weeks after waxing. Over time the hair grows back more slowly as well as sparser and finer.

What is Azulene oil for?

Applying Azulene oil daily will moisturize your skin and help to prevent ingrown hair. Parissa Azulene Oil is extracted from the plant known as Chamomile. It is used as an after care oil for hair removal waxing as it has antiseptic and anti-inflammatory properties. The unique colour blue is from a compound called Azulene, this is mostly found within the essential oil of plants from the Asteraceae family (i.e. Chamomile). A larger bottle of Parissa Azulene Oil is sold separately, with an easy application spray head.

How do I achieve the right brow shape?

Parissa has put together a guide on this topic including illustrations. The main points are, don't remove too much hair and find and enhance your existing natural shape. View the guide: <https://parissa.com/blogs/how-to/how-to-get-the-perfect-brows>

Warnings: Always Follow Parissa's Waxing Instructions.

- ⚠ Improper use of waxes can cause skin lifting, bruising or skin irritation. If in doubt, contact Parissa before waxing for extra instructions or advice.
- ⚠ Do not wax sensitive, sunburned, irritated, broken or injured skin.
- ⚠ Avoid waxing over varicose veins, moles, warts or other skin irregularities.
- ⚠ Do not use alcohol or astringents before or after waxing.
- ⚠ Do not use beauty or cosmetic products on the skin immediately after waxing.
- ⚠ Do not wax skin treated with vitamin A derivatives such as Retin A, Isotretinoin (Accutane) or Glycolic Acid or Alpha Hydroxy Acid products.
- ⚠ Do not sunbathe before or after waxing.
