

CARE & USE

CARE BETWEEN USES

Thoroughly dry a wet Cartridge by pressing into an empty (no water) Outer Cup, then dump any excess water. Remove the One-Way Silicone Valve and allow Cartridge to air-dry thoroughly (**depending on humidity it will take 2-4 days to completely dry**). Clean and dry the One-Way Silicone Valve (instructions below), then reassemble your Grayl.

ONE-WAY VALVE IS DISHWASHER SAFE!

Regularly wash the One-Way Silicone Valve between uses to remove smell and residue left behind from drink mix powders or other beverages. Hand wash with warm, soapy water or place in a dishwasher. **Do not expose Cartridge to soap or cleaning agents of any kind.**

SO YOU WANT TO BE A PRO?

We all love to keep our sodium levels nice and high when we are enduring some heavy adventures. But what about after the adventure? **Try these in your drink-mix ready Grayl**

LET'S GO!

1.0

INSTALLATION & REMOVAL

01

INSTALLATION

Using your thumbs firmly press and seat the *One-Way Silicone Valve* into the cartridge. Insert finger into valve if needed.

02

SEATING & SECURING

Protect the cartridge media by double-checking that the valve is seated and secured. Check proper installation visually, by ensuring the rim of the silicone is flush with topside, and that the base of the Valve is flush with Cartridge floor.

03

REMOVAL

Using your fingers, firmly pinch the top of the *One-Way Silicone Valve*, then firmly grasp and remove the Valve from the Cartridge.

ONE-WAY VALVE

The **pre-installed** *One-Way Silicone Valve* prevents liquid from reversing direction and flowing back into the filter Cartridge. Allowing the use of electrolytes, drink mixes, and other beverages with your Grayl.

FILTER YOUR WATER

With a *One-Way Silicone Valve* installed, make clean filtered and purified water with your Grayl.

ADD YOUR DRINK MIX

Add electrolytes or a sport drink mix to your filtered water (only if *One-Way Silicone Valve* is installed). Alternatively, you can add any other potable (i.e. safe to consume) beverage via the Drink-Thru Cap.

WHAT'S A ONE-WAY VALVE?

A Grayl® *One-Way Silicone Valve* consists of four “duck bill valves” that **both** prevent water (or other beverages) in your bottle from backflowing through the Cartridge and also allow clean filtered water to pass through the Cartridge into the Inner Press.
