## Choose Location

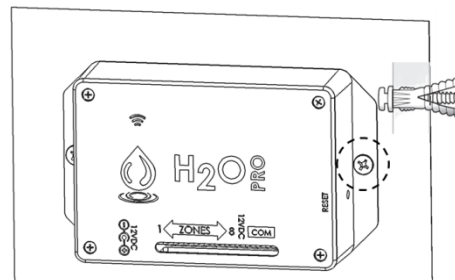

- Choose a location for the H2OPro that has adequate Wi-Fi signal strength and is convenient for attaching all sprinkler valve wires. Note: The Wi-Fi signal strength at the desired location can be verified using your smart device.
- The H2OPro should be installed in a dry location, preferably indoors. If the unit must be located in a wet environment, a dry box is recommended.

## Secure

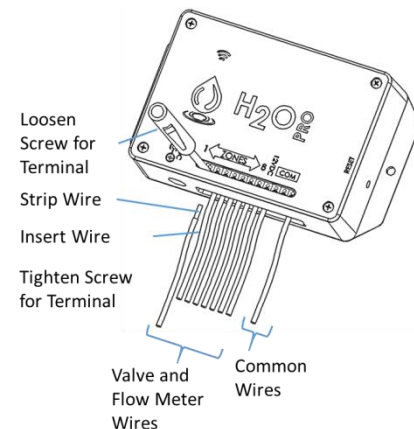

- Use the included screws to attach the H2OPro to a wall. If the wall is drywall or masonry use the included anchors, and drill a 3/16" pilot hole.

## Connect Wires

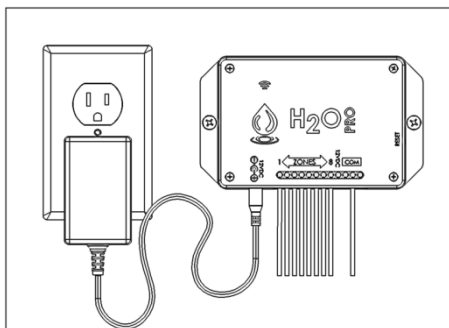

- Connect valve and flow meter control wires to a ZONE terminal.
- Connect common wires to the COM terminals.

## Connect Power Supply

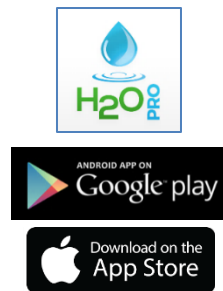

- Plug the provided AC wall adapter power supply into a 120AC outlet and connect the barrel connector to the H2OPro.
- LED will blink to indicate system is ready for Wi-Fi set up from the App.

## Download the App

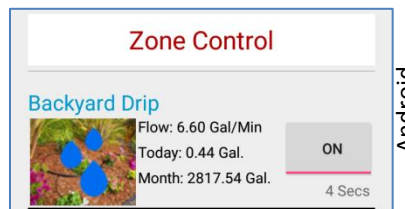

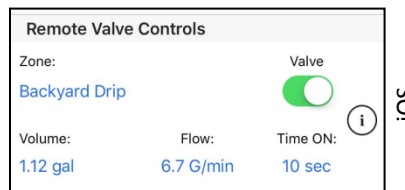

- Download the iOS or Android H2OPro App to your smart device with Wi-Fi.
- Follow the instructions to connect the H2OPro to your home Wi-Fi network. Refer to the App manuals if necessary.

## Setup Watering Schedules

- Use the H2OPro App to setup your watering schedules and other advanced features.
- The H2OPro App provides a simple, intuitive interface for programming watering schedules using your smart device. Gone are the days of archaic dials and cryptic symbols. Setting a schedule to run on certain days of the week or as an every other day routine takes just a few taps in the App.
