SMART STEAM OVEN PRODUCT MANUAL

INSTALLATION & REMOVING OF WATER TANK, DRIP TRAY, WATER PURIFIER

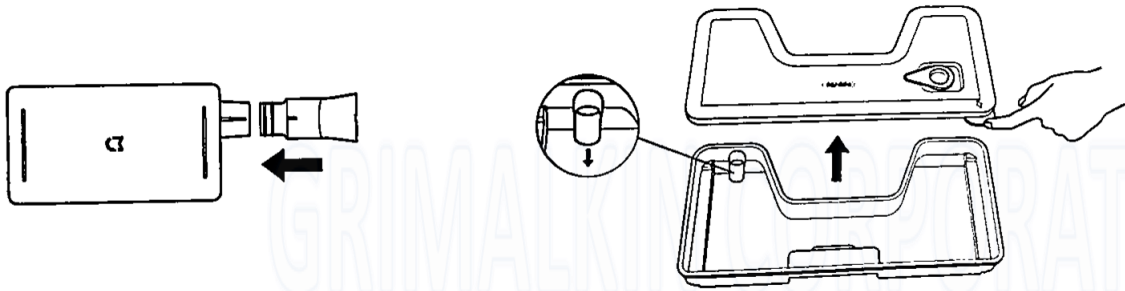

This item requires installation of water tank and drip tray to operate properly. The water purifier can be used on the ff. instances.

1. If tap water is used for cooking, water purifier is necessary to lessen water scales generated in the evaporation pan.
2. If water purifier will not be used, make sure to use distilled or purified water in cooking. The following accessories are required: water tank, drip tray & elbow connecting pipe.

SMART STEAM OVEN PRODUCT MANUAL

INSTALLATION OF WATER PURIFIER

1. Install the straight connecting pipe into the outlet port of water purifier.
2. Open the water tank cover, and take out the elbow connector.

Note: Make sure to store the elbow connector properly for future use.

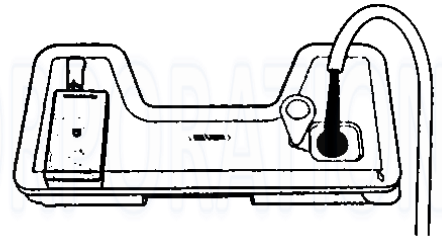

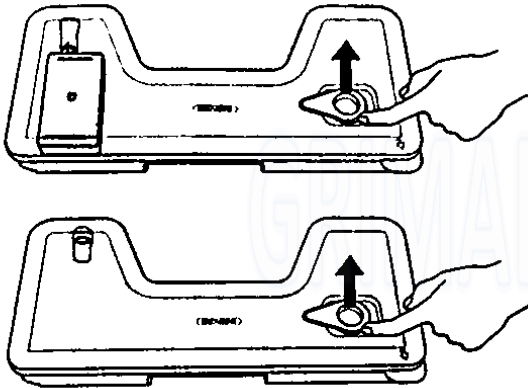

3. Make sure that the Xiaomi logo on the water purifier is facing upwards, connect the straight connecting pipe to the water outlet on the water tank.
4. Cover the water tank properly.

Note: After covering the water tank, double check each sides to ensure it is closed properly and tight to avoid leakage.

SMART STEAM OVEN PRODUCT MANUAL

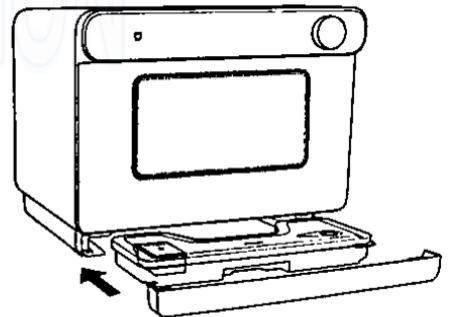

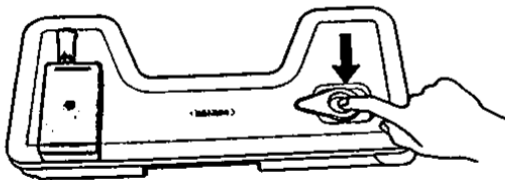

INSTALLATION OF WATER TANK & WATER INJECTION

1. Open water tank inlet cover (applicable for both with / without water purifier)
2. Inject water to be used for cooking through the water tank inlet port

Note:

- Capacity of the water tank is between 0.2L ~ 1.2L. Please follow the scale indicated on the water tank as reference.
- Make sure that water tank is properly installed to avoid leakage.
- Wash & clean the water tank on a regular basis.

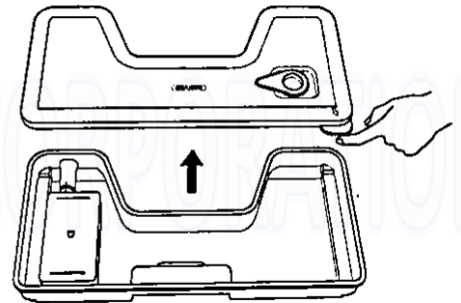

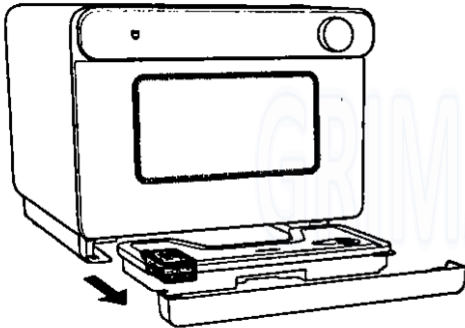

3. Cover the Water tank inlet tightly
4. Insert the water tank into the lower portion of the oven and push until it reached the end. Install the drip tray.

Note: Make sure that the water tank is pushed to the end to avoid leakage incidents.

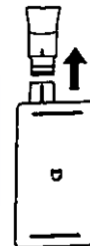

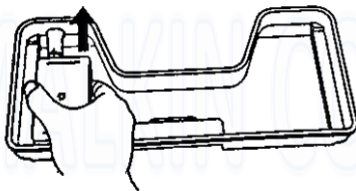

SMART STEAM OVEN PRODUCT MANUAL

REMOVING THE WATER TANK AND WATER PURIFIER

1. Pull the Drip tray and water tank outwards.
2. Open the water tank cover.

3. Remove the water purifier by pulling it upwards

Note: If the Water purifier has less than 10% of lifespan make sure to replace immediately as it will run out fast.

4. Remove the straight connecting pipe.

Note: Do not throw the straight connecting pipe, store properly for future use.

SMART STEAM OVEN PRODUCT MANUAL

WATCH TUTORIALS ON HOW TO USE

For initial use, when power supply is connected QR code will appear on the selection knob, scan the QR Code to watch the tutorials on how to use.

CLEANING FUNCTION FOR NEW UNITS

1. Before connecting power supply, check the manual on how to install the water purifier, make sure that water tank is filled with water fully before installing to the unit then properly install the drip tray.
2. For initial use, when power supply is connected, QR code will be displayed on the selection knob, press the knob to start cleaning.

Note: You can stop the cleaning in the middle of the operation, but you cannot pause the cleaning operation. When cleaning is stopped, this will be regarded as the cleaning is completed. Reminders will not be present afterwards.

SMART STEAM OVEN PRODUCT MANUAL

USAGE

Power On / Off

1. Power On

- When plugging in power supply, after the power on animation, unit will be on Pre-start status, when the display screen shows “长按开启” (which means long press to turn on) long press the selection knob for 2 seconds. By default, unit will be set on the previously used cooking program.

- Do not touch the power cord with wet hands to avoid electric shock.
- Do not overly squeeze, bend or twist the power cord.
- Use only with 220V outlet
- Unplug the power cord the proper way to avoid damages on the power cord.

SMART STEAM OVEN PRODUCT MANUAL

PRECAUTIONS

Environment

- This product must be stored in a cool & dry place.
- The oven must be placed on a flat surface. Smoke and oil are produced while using the oven, to avoid damaging other furniture or causing fire due to the high temperature the oven must have at an appropriate distance on all sides. 10cm each on back and sides, 25cm from the top.
- Avoid placing the oven near flammable materials or heat sources.

While using

- Do not put anything on top of the oven.
- Do not put flammable items inside the oven like paper or plastic products.
- Do not put sealed containers inside the oven while reheating, this may explode.
- When putting containers inside the oven, make sure it is not filled full to prevent overflowing while heating.
- When using metallic containers, take extra caution.
- Make sure to unplug the power cord after using & if unit will not be used for a long duration.
- The water purifier lessen the water scale generated but it doesn't prevent water scales. If there is visible water scale present inside the evaporation pan clean it immediately and replace the water purifier.

SMART STEAM OVEN PRODUCT MANUAL

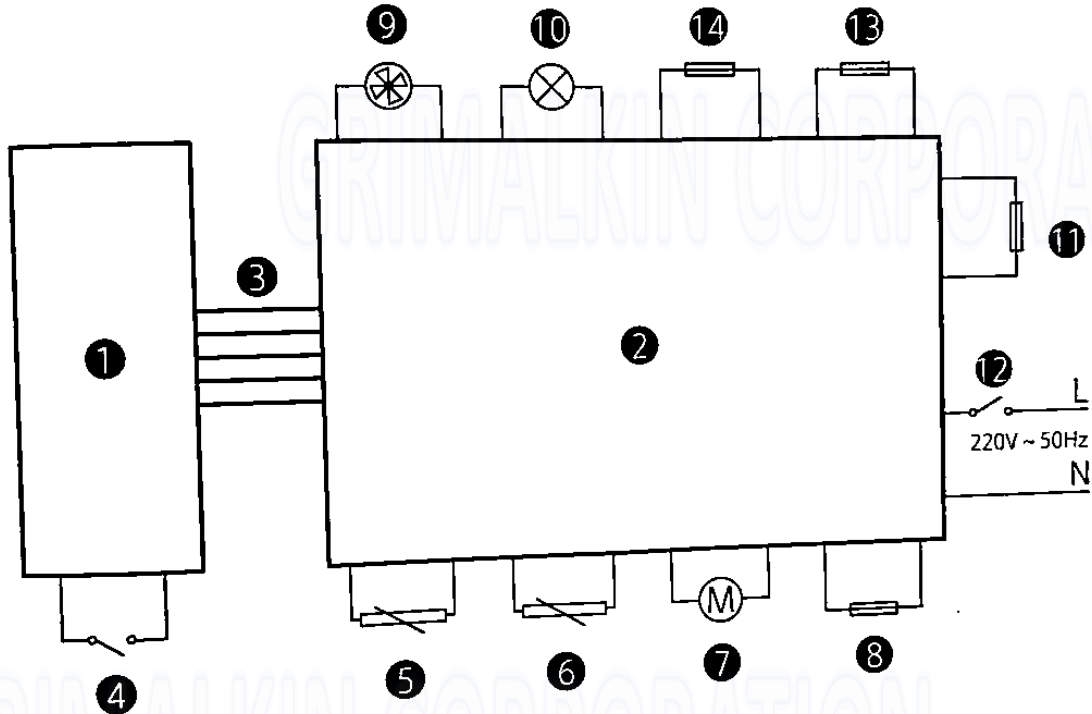

BASIC PARAMETERS

Product Name	Smart Steam Oven
Model No.	MZKXD01ACM-MZ01
Power (Steaming)	1200W
Power (Baking)	1450W
Power (Steam Grilling)	1450W
Capacity	30L
Rated Frequency	50Hz
Rated Voltage	220V
Item Dimensions	506 x 460 x 388 mm
Wi-Fi Connection	Wi-Fi IEE 802.11b/g/n 2.4GHz
Approved Code	CMIIT ID: 2017DP6053 radio transmitter
