# L322 Roof Rack install

# Find the 6 roof pockets
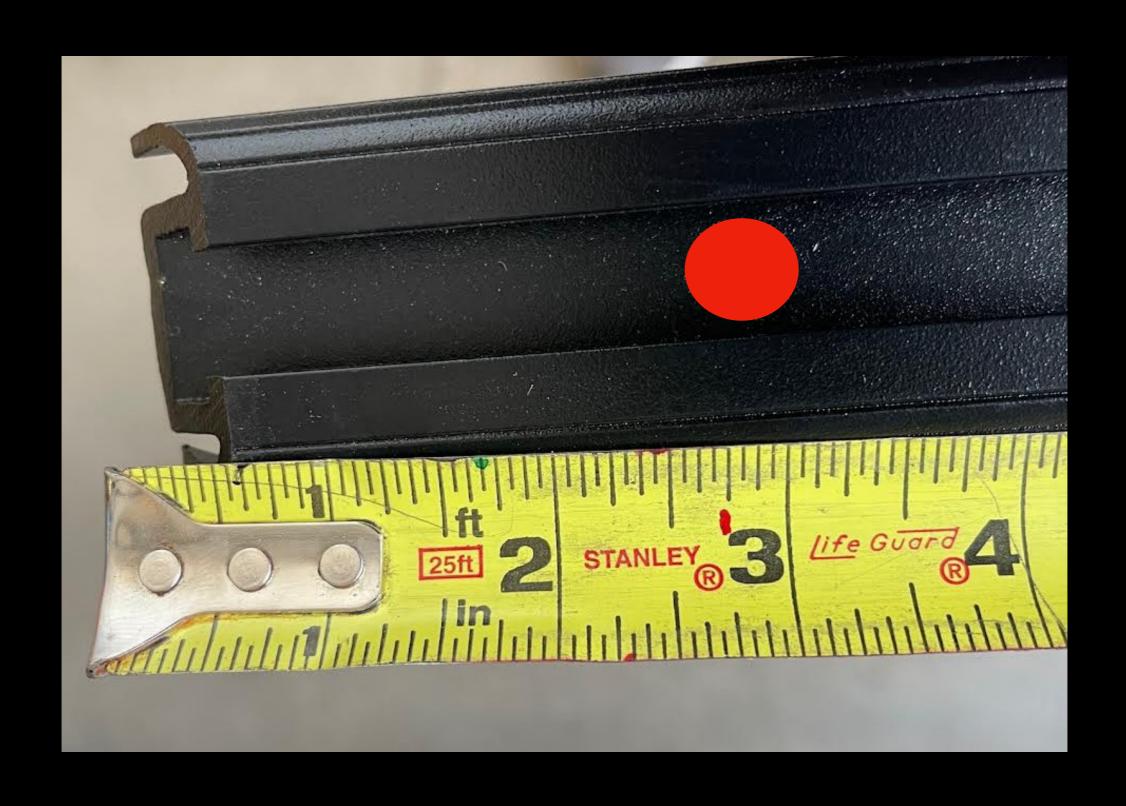

Open all six track covers and remove the plastic cover

# Remove the Allen plugs

From the end of the track, drill an 11/32" hole at 2 3/4" in the center.

Loosely install the track to the first mounting location at the front of the Rover.

Mark the remaining 2 holes. Remove the track and then dill them in the center with a 11/32" drill bit.

With all the holes drilled, mount the track to the roof with the 6 Allen head bolts and washers.

**\*\* large bolts shown are for location reference only \*\***

You can now properly mount the Front Runner roof rack following their provided instructions.
