

Electrostatic Technology

EASY. FAST. EFFICIENT.

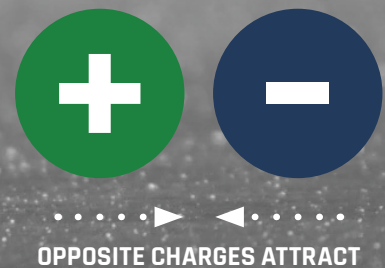

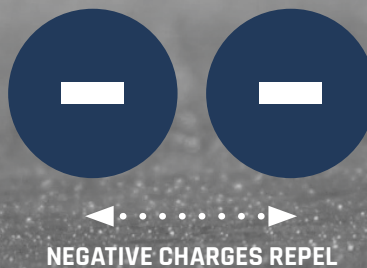

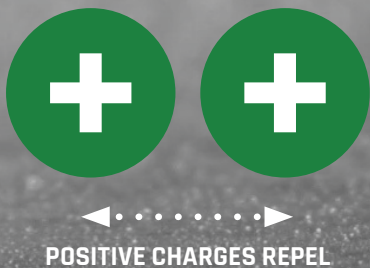

How It Works

THE SCIENCE BEHIND THE SPRAYERS.

Victory Innovations® electrostatic sprayers are based on a simple principle: opposites attract.

Victory sprayers add a positive electrostatic charge to whatever chemical you're using. The positively charged particles repel each other like magnets, resulting in more even, far-reaching application.

Additionally, because most surfaces have a negative or neutral charge, they attract the positively charged particles. This creates a wrapping effect, which helps you easily cover curved or hard-to-reach surfaces like doorknobs and corners.

Why It's Better

DESIGNED TO HELP YOU GET THE JOB DONE.

With electrostatic technology, your chemical goes further — in multiple ways.

Because the positively charged particles repel each other, they provide wider coverage than you'd get with a traditional trigger sprayer. They also won't clump together, so instead of irregular pools of chemical, you get a perfectly even layer. That means you can cover an area in less than half the time it takes you now. And compared with a traditional trigger sprayer, a Victory electrostatic sprayer uses less than half the amount of chemical to cover the same area.

ELECTROSTATIC SPRAYERS**

Where It's Used

SPRAYERS SOLVE PROBLEMS – FROM MICRO TO MACRO.

Victory Innovations sprayers are used across a range of industries, from air travel to schools to restaurants. The best part? Our sprayers support any water-based chemical, so you're not limited to one application. Electrostatic technology helps you solve a variety of problems, from viruses to larger pests.

DISINFECTION

Clean and disinfect spaces to the fullest extent, giving you peace of mind.

PEST CONTROL

Ensure every hard-to-reach area is coated and banish pests for good.

AGRICULTURE

Apply pesticides, fungicides and fertilizers with ease.

MOLD AND MILDEW CONTROL

Keep spaces safe and prevent regrowth with full-coverage chemical application.

Want to streamline chemical application,
save money and generally make life easier?
We can help.
