

Banjo Brothers **Seat Bag** Instructions

For the 01009 (Mini), 01010 (Small), 01020 (Med), and 01030 (Large) Seat Bags

Installation

1. Slide saddle straps over the top of the saddle rails as shown, making sure the strap passes through the upper webbing loop

2. Pass free end of strap up through the D-ring

3. Fold saddle strap back on itself and press hook and loop strips together. Then fasten hook and loop on the seatpost strap.

The lower webbing loop can be used to provide additional stability, especially on the expanding seat bags

Do not ever do this. If you see someone with a bag attached like this, also gently tell him or her it's really a bad idea.

General comments

- To keep your bag stable and reduce rattling of contents, adjust your saddle strap so that it is snug around the contents. If you leave the strap loose, the bag will sway and the contents will likely rattle, making you and your riding partners crazy.
- Your bag is built to be used in rain or shine. If it gets dirty, clean it with soap and water and air dry. Otherwise, enjoy the patina that says "A little rain never stops me". Do not put it in the dryer unless you want it to melt. Solvents can and will deteriorate the synthetic fibers. Sustained exposure to sunlight will also cause some fading and deterioration to all fabrics. We can't defeat the laws of chemistry and physics, but we do our best to resist them.
