Ki Mobility
Better by Design

LIBERTY IS INDEPENDENCE

Finally, one wheelchair that offers true portability, enables independent propulsion and provides the benefits of tilt-in-space!

PROPULSION

Liberty is designed for independent mobility, especially foot propulsion. The front seat height remains the same regardless of the tilt angle. Simply choose the tilt angle that provides the best pelvic stability without compromising mobility.

REPOSITIONING

Everyone needs relief from sitting in a static position. Whether your primary concern is pressure relief, facilitating proper posture or just providing a break from gravity, Liberty makes it painless. Featuring an easy to adjust gas spring design, adjusting the system for effortless repositioning is simple.

PORTABILITY

Liberty is the only adult tilt-in-space that can fold into a portable package ideal for transportation. Want an even smaller package? Choose the optional folding backrest. With a transport weight under 26 pounds, it's the lightest adult tilt-in-space available. Liberty gives you the independence to get out and go!
