

Floorboard Paint 2.5L

A tough polyurethane paint for wooden floorboards that is available in a choice of four attractive colours. If your floorboards aren't in good enough condition to sand and varnish, or you simply fancy brightening them up, then choose a dedicated floorboard paint that will not only enhance the look of the wood, but protect it from every day wear and tear too. We've got just the paint.

- + Can be used in any room in the house that has floorboards, such as hallways and children's bedrooms
- + Dries to a smart low sheen finish
- + It not only looks good, it does the wood good by protecting it
- + This paint is polyurethane, which means tough, tough, tough
- + Great at resisting stains – just wipe them off
- + Comes in a choice of vibrant colours

Prepare It

Any protruding nails should be dealt with; use a hammer and punch to knock them in. Sand off any blemishes and give the surface a good wipe over with a damp (not wet) cloth and allow to dry thoroughly. Stir the paint and apply it. If your boards are really pitted or damaged, you may want to put some wood filler into offending holes, splits and gashes.

Apply It

First of all the room needs to be warm, around 15°C. Do not apply in temperatures less than 10°C. Depending on the condition of your floorboards, and the look you want to achieve, you may need two coats. If your floorboards are in good shape and you want a bit of the wood grain to show through, then one coat should be fine. However, if there are substantial blemishes then two coats are recommended, which will make them even harder wearing. Apply by brush or mini-roller (the kind you use for getting behind radiators). Do not use a normal sized roller as this will cause drips in between the boards, which could be a problem if you are painting an upstairs room as the paint will work its way down onto the ceiling below.

Cover It

Depending on the porosity of the wood, you can expect a 2.5 litre tin to cover approximately 20m² (215 sq. ft.) with one coat.

Dry It

It's usually touch dry in 12 hours, but please make sure it's completely hard before using the floor. Ideally leave it for two days (assuming the temperature of the room is 15°C and you have good ventilation), after which furniture should be 'placed' not 'dragged' over the fresh paint to avoid scratching and damage.

Clean It

Tools can be cleaned with White Spirit after use.

Store It

The shelf life of Floorboard Paint, if unopened, is one year.

Disposal and Safety information

Please see the *Material Safety Data Sheet* at www.paintpeople.co.uk for safety information.

Availability

Floorboard Paint is supplied in 2.5 litre containers. Available from www.paintpeople.co.uk

Colour Range

Free tile samples are available on request. While great care is taken with the colour samples shown, no guarantee can be given that they represent exactly the colours offered.
