# Askina® SilNet

Soft silicone wound contact layer

Skin and Wound Management

Silicone Wound Dressing  
Alternative.

# Askina® SilNet

For gentle protection of fragile skin

## Soft silicone wound contact layer

- Designed to protect the wound site from mechanical disruption during dressing changes.
- Prevents adhesion of the secondary dressing to the wound surface and minimises the trauma associated with dressing change.

- Better breath ability
- Allows exudate to pass through

- ### Advantages
- Non-adherent:
    - ✓ protects fragile granulation tissue
    - ✓ atraumatic dressing change
  - Soft and conformable
  - Compatible with topical treatments
  - Allows passage of exudate through the dressing

## No stripping of epidermal cells on removal (SEM images)

When Askina® SilNet is removed, atraumatic dressing change ensures there is no stripping of epidermal cells.

No epidermal cells on the surface

Askina® SilNet: soft silicone

Epidermal cells stripped from the skin surface

Standard acrylic adhesive

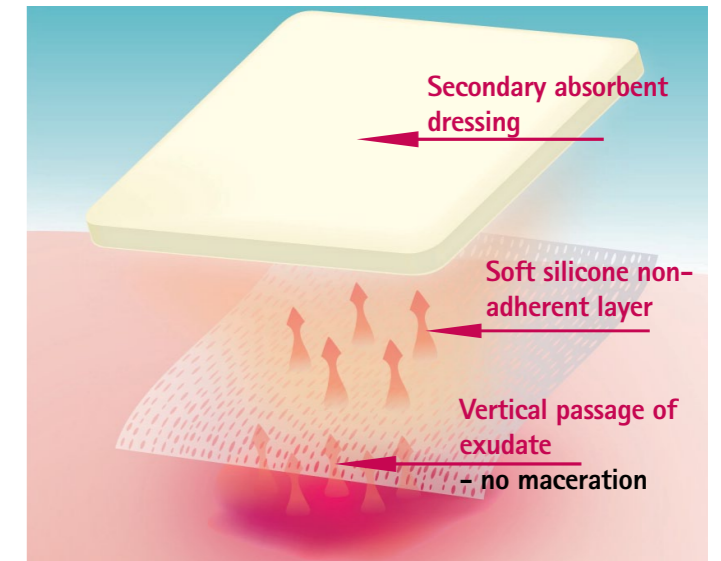

# Askina® SilNet

How it works

- Askina® SilNet adheres gently to the wound and surrounding skin surface and facilitates atraumatic dressing removal.
- Its porous structure allows vertical passage of exudate into the secondary absorbing dressing.

Askina® SilNet can be left in place for several days, as long as the exudate passes freely into the secondary dressing.

## Indications

- Cuts
- Abrasions
- Skin tears
- Traumatic wounds
- First and second degree burns
- Fixation of skin grafts
- Donor sites
- Surgical wounds
- Lacerations

## Wound Bed Preparation

Before applying Askina® SilNet, thoroughly cleanse the wound with a cleansing solution (Eg: *Prontosan® Solution*).

For continued wound cleansing and debridement, use *Prontosan® Wound Gel*.

## Up to 7 days wear time

## Dressing Application

Example of a spider bite

1 After cleansing the wound, dry the skin surrounding the open wound.

2 Remove Askina® SilNet from the liners. Cover the wound with either side facing the wound surface

3 Apply suitable foam absorbing secondary dressing and fixation over Askina® SilNet if needed.
