## ноw то use Quick Manual

### 4. Aim Toward the Bladder

Put the gel-applied probe on the patient's abdomen and aim toward the bladder.

**Important:** Please make sure that the Scan button of the probe should be facing the foot side of the patient.

#### 5. Locate the Bladder by Pre-scan Function

Press the Scan button to start Pre-scan, and then the Pre-scan function shows the live bladder image.

When the bladder image looks the biggest on the screen, press the Scan button.

**Important:** Please make sure that the Pre-scan function is 'on' in the device set-up.

**Bladderpoint<sup>™</sup>** is a proprietary bladder targeting system used in Pre-scan mode to get a quick and accurate scan by placing crosshairs on the fluid in the bladder.

### 6. Scan Result Screen

Measured bladder volume will be displayed in ml with 12 frames to ensure the adequate measurement.

### 7. Save or Re-scan
