

Reynard Chlorhexidine Wash Cloths.

Longer lasting protection.

**providing a fast , effective and rinse-free
antiseptic body cleansing solution.**

Impregnated with 2% chlorhexidine digluconate, these antiseptic wipes provide an invisible, antibacterial barrier which continues to kill any harmful bacteria on the skin for hours, keeping patients cleansed, moisturised and protected. Perfume, latex and alcohol free, these wipes can be used hot, cold or at room temperature for optimal patient comfort .

Reynard is reassurance.

Reynard
Health Supplies

2% Chlorhexidine Wash Cloths

Specially designed for pre-admission patient washing and for inpatient use prior to clinical procedures. Reynard chlorhexidine wash cloths contain 2% chlorhexidine digluconate along with skin conditioners and moisturisers to provide a simple, rinse-free antiseptic body cleansing solution. Effective against most vegetative bacteria, yeast and enveloped viruses, these alcohol and fragrance-free wipes efficiently cleanse and moisturise the body in one easy step.

Chlorhexidine digluconate rapidly kills all harmful bacteria that can be found on a patient's skin, providing long lasting residual protection with binding properties, ensuring an extra antibacterial barrier for hospital patients. Available in a variety of pack sizes and cloth substrates to allow you to choose the best solution for any given application.

- **Extra-large, thick cloth**
- **Infection control friendly: one wipe per area**
- **Perfume, latex and alcohol free**
- **Wipes can be used hot, cold or at room temperature**

- 2 Cloth 2:** Armpits, chest area and sides of body
- 3 Cloth 3:** Groin and buttocks area
- 4 Cloth 4:** Back and both legs

More from Reynard...

Bath in Bed

A complete bathing solution: cleanse and moisturise the skin, remove harmful bacteria and control odour in one easy step. An alternative solution to traditional bathing, eliminating the need for water and reusable accessories that can harbour harmful bacteria.

Upgrading to Reynard Bath in bed wipes can play an important role in reducing cross contamination. Available in various pack sizes and cloth substrates to suits every need.

Shampoo Cap

A single step cleansing and conditioning solution that leaves hair smelling fresh and feeling great. The rinse free cap is impregnated with a gentle, conditioning shampoo that is designed to release when massaged. The used solution is then absorbed back into the cap, along with any dirt, EEG gel, debris or blood.

Designed to be used where traditional showering or hair washing solutions are not available and are perfect for low mobility situations or where traditional solutions are not optimal.
