Nimble Storage System

Nimble Storage System

It's all about flexibility, where you are in control of the size and set up that works best for you.

The Nimble Storage System has been designed to combine high density storage with strong and durable shelving. With the need for more efficient supply methods within healthcare facilities, space is limited and therefore more innovative solutions are required. Our system allows you to optimise your supply chain within your facility by providing a highly customisable storage solution.

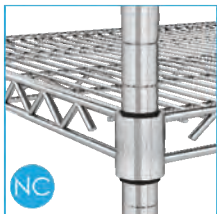

We have essentially taken the best of both worlds, from wire shelving and modular basket storage and combined them. The modular design of the Nimble System allows for easy integration with unlimited options to suit your needs.

Strength: Using the collar sleeve mechanism to deliver high weight capacities.

Flexibility: Ability to create a fit for purpose solution in any environment.

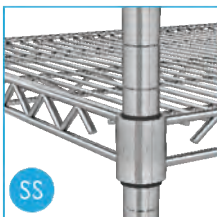

Functionality: Maximise your storage capacity with easy to customise solutions

Nimble Wire Shelving Options

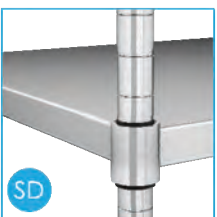

Nickel Chrome (NC)

NC is an affordable solution that functions well in most areas of the hospital environments. Nickel and chrome are bonded to the steel to give a great finish which is strong and durable.

Stainless Steel (SS)

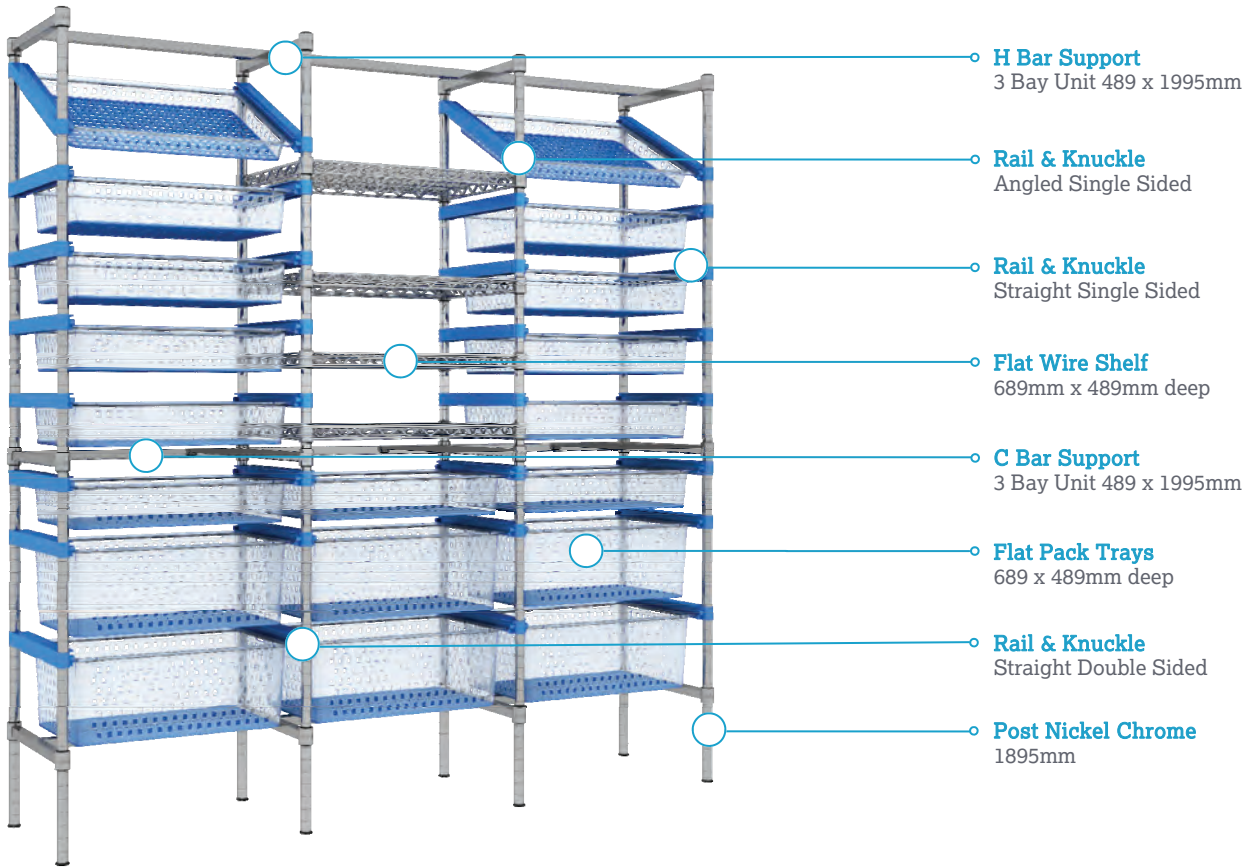

SS wire shelving can be used throughout any environment. Made from a high grade 304 SS which is suitable for all areas of the hospital- including wet environments.

Solid Stainless Steel (SD)

SD shelving has unlimited applications. SD can be used for storage, trolley or table tops. The smooth surface is easy to clean and made from 304 grade SS.

Customised and built to suit your storage needs...

Nimble Flat Pack Trays

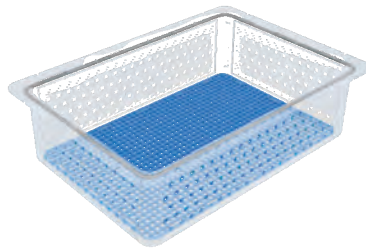

The perfect accompaniment to the Nimble 60-40 system. These trays allow the user to hold items without the fear of dust collecting. The flat packed design means that the trays can easily be taken apart, cleaned and stored without taking up precious space.

The plastic tray can be easily transported and stored conveniently with added features that make Nimble a cut above the rest. The fine mesh base gives clinicians the opportunity to store even the smallest of items in the trays. As the trays can be easily disassembled this means cleaning and washing the baskets are a simple process.

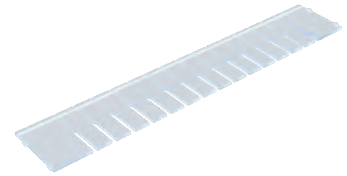

Each part of the tray clips together simply, held together by a steel wire ring. The tongue and groove corners give it a strong and sturdy platform for your storage needs. By making the parts separately this allowed us to mould a plastic base that replicates the wire style storage, which eliminates dust from your storage. The shape of the holes on the base are designed around a tear drop so that no dust can gather in the holes, and the dust and dirt simply fall through.

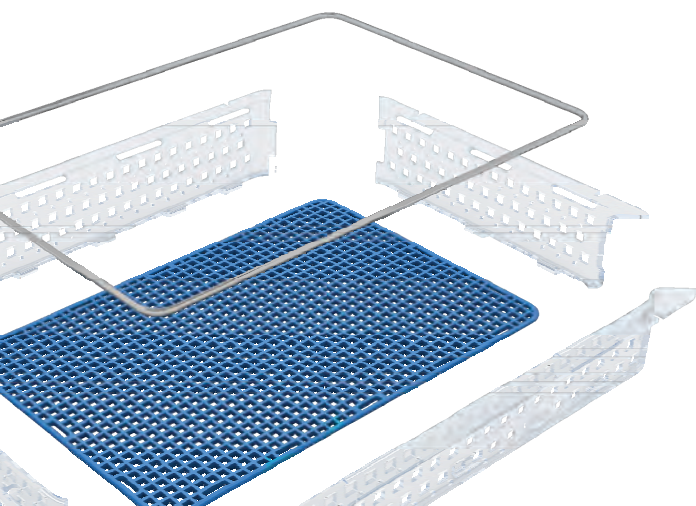

100mm Flat Pack Tray
598x398x100mm

200mm Flat Pack Tray
598x398x200mm

Clear Divider Sets 7.5mm Width
598x398mm

An innovative tray that ensures the Nimble system provides a great storage experience for healthcare facilities.

Nimble Wire Baskets & Wall Panels

Not all wire baskets are made equal...

Designed using fine mesh to ensure even small items can be stored, the Nimble wire baskets also include reinforced bars for extra strength, a clever lever system and a stacker that maximises space. The Nimble wire baskets come in a range of sizes and are perfect for use with wire shelving systems as well as wall mount applications in nickel chrome and stainless steel.

Small Wire Basket

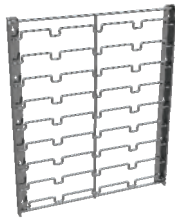

Medium Wire Basket

Large Wire Basket

Extra Large Wire Basket

Wire Wall Panel

The wall panels have been designed to allow each unit to sit flush against each other so you can connect as many panels together as you like.

Divider

No more bent or hard to remove dividers. Ours have been designed to be easily added and removed to baskets with a simple lever system.

Stacker

Nimble's stackable baskets eliminate wasted space by storing baskets on top of each other, on a desk, workstation, or shelving.
