

A NuWave Solutions Company

Trade Organizations

NuWave-Solutions.com and the following professional associations engaged in the use and specification of zinc-rich coatings for industrial applications:

The American Fence Association (AFA):

The American Fence Association (AFA) benefits the fence industry and the consumer by promoting the highest levels of professionalism, ethics, and product standards, through the dissemination of information and the education of its members.

The American Galvanizers Associations (AGA):

The AGA is a non-profit trade association whose members represent the North American after-fabrication hot-dip galvanizing industry. The AGA is widely recognized as the foremost authority in the galvanizing industry. For more information on the AGA, contact:

The Society for Protective Coatings (SSPC):

The SSPC was founded in 1950 as the Steel Structures Painting Council, a non-profit professional society concerned with the use of coatings to protect industrial steel structures. Its goals today are to advance the technology and promote the use of protective coatings to preserve industrial, marine and commercial structures, components and substrates. For more information on the SSPC, contact:

The National Association of Corrosion Engineers (NACE):

NACE International is dedicated to promoting public safety, protecting the environment and reducing the economic impact of corrosion by advancing the knowledge of corrosion engineering and science. It was established in 1943 by a group of engineers involved with the introduction of cathodic protection. Today, it is the largest organization in the world committed to the study of corrosion. For more information on NACE, contact:

The American Society for Testing and Materials (ASTM):

Established in 1898, it is the ASTM's goal to be the foremost developer and provider of voluntary consensus standards, related technical information, and services having internationally recognized quality and applicability that: promote health and safety, and the overall quality of life; contribute to the reliability of materials, products, systems and services; and facilitate national, regional, and international commerce. For more information on ASTM.
