STEP 1

Open the box carefully, ensuring the blade of the knife does not come into contact with the product. Remove packaging and lift the product out of the box and gently place face down onto a clean, flat, surface on the ground. We recommend using a towel or sheet underneath for protection.

STEP 2

Holding the mirror in place, determine where you wish to hang/lean your mirror and mark on the wall where the wall screw anchor should be inserted. Drill a hole into the wall to house the plastic screw anchor. A pilot hole is recommended to be drilled for installation. Insert the plastic screw anchor (A) and tighten until flush with the wall surface. Screw the provided wall hook screw anchor (B) clockwise into the plastic screw anchor until tight and secure. The hook should be pointing towards the ceiling.
