Product Maintenance

With a little care you can prolong the life of your furniture. The following information is only intended as a general guideline. Please follow the instructions to ensure maximum longevity of your Sarah Ellison furniture.

Timber Care

Our timber pieces are all treated and sealed for everyday living, but it is important to be mindful in their placement, as extreme conditions (such as harsh sunlight) can change the colour of the timber. Be careful not to scratch or damage the surface with sharp objects.

Timber is responsive to its environment, be mindful that heat and moisture can cause movement and cracks in joints and damage lacquer. We recommend using placemats and trivets to avoid spills soaking into the timber, and to also protect against heat transfer. The general rule is if something is too hot to hold, it is too hot to place on timber. Should spills occur, wipe immediately with a damp cloth.
