COBALT BLUE Australasia provides the information submitted in this Product Information Sheet based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Product: HYGIBAC Gel

ALCOHOL HAND SANITISER

DESCRIPTION

HygiBac GEL is an alcohol gel hand sanitiser designed to rapidly decrease the bacterial loading on hands when normal hand washing facilities using warm water 'hand soap' and single use paper towels are not practical.

HygiBac GEL contains Ethyl alcohol 80% v/v together with Triclosan.

Complies with AQIS Guidelines for Hand Disinfectants for use at Class 5 Quarantine Approved Premises

APPLICATION

Squirt the Hygibac gel hand sanitizer into palm of your hand. It should be about the size of 20 cents. 2 ml.

Start rubbing your hands together gently. Be sure to get every single spot and not miss any part. Get in between fingers, **under rings and jewellery**. Rub hand sanitiser thoroughly on hands and about 3 cm up your wrist. Hold hands downward to avoid contamination on the upper part of your arms.

Finish up. Don't dry your hands on a towel, it will be better to let them air dry.

NOTE: IT IS NOT RECOMMENDED THAT RINGS OR JEWELLERY BE WORN IN THE FOOD PROCESSING INDUSTRY

Warnings
