In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.*

## Product: SPOTLESS

**SPOTLESS Rinse Aid is added to the final rinse in dishwashing machines to make the water sheet off evenly to reduce drying time and leave items sparkling AND SPOTLESS**

### FEATURES

- SPOTLESS Rinse Aid can be used in all dishwashers from large commercial machines down to domestic.
- SPOTLESS Rinse Aid is designed for use in hard water areas
- Use in conjunction with GLEAM for that perfect wash.
- The special additives in SPOTLESS Rinse Aid will keep the rinse lines and jets scale free, whilst the GLEAM keeps the rest of the machine scale free.
- SPOTLESS Rinse Aid is a concentrated rinse aid. Only a small amount is needed per cycle so a drum lasts a long time.
- The special blend of low foam detergents used makes the water sheet off easily, leading to reduced spotting and streaking, making glasses sparkle.

### HOW & WHERE TO USE

- In commercial dishwashers SPOTLESS Rinse Aid is usually added through an automatic feeder. This is adjusted by a COBALT BLUE technician to give optimum results.
- In domestic machines simply add SPOTLESS Rinse Aid to the rinse aid holding tank when required.
