Installation

Location

Plan location of transceiver and microphone bracket before starting the installation.

Select a location that is convenient for operation, yet does not interfere with the driver or passenger.

The transceiver is usually mounted to the underside of the dash with the microphone bracket beside it.

Mounting and Connection

Note

The transceiver is held in the universal mounting bracket by two thumbscrews which allow for adjustment at a convenient angle.

The bracket includes two self-tapping screws and star washers. The mounting must be mechanically strong, conveniently located.

1. Hold the radio with the mounting bracket in the exact desired location. If there is no interference, remove the bracket and use it as a template to mark the location for the mounting screws.

2. Drill the holes and secure the bracket.
Connect the antenna cable plug to the receptacle marked “ANT” on the back of the unit.
Installation

**Note**
Connecting to an accessory fuse prevents the unit from being left on accidentally, and also permits operating the unit without running the engine.

**Note**
In positive ground vehicles the red wire goes to the chassis and the black wire is connected to the ignition switch.

**Note**
Before installing the CB radio, visually check the vehicle’s battery connection to determine which terminal, positive or negative, is grounded (positive is the larger of the two) to the engine block (or chassis). A negatively grounded vehicle has its negative lead grounded to the chassis.

4 In a negative grounded vehicle, connect the red lead of the DC power cord to an accessory 12 volt fuse.

5 Connect the black lead to the negative side of the vehicle. This is usually the chassis. Any convenient location with a good electrical contact (remove paint) may be used.
Installation

6 Plug power cable into back of unit marked “Power.” Be sure to observe polarity markings.

7 Mount the microphone bracket on either side of the unit (driver’s left) using two screws supplied. Bracket should be placed under the dash so microphone is readily accessible.

8 Attach the 4-pin microphone cable to receptacle, on the front of unit and install unit on bracket securely.
Antennas

CB Antenna

Since the maximum allowable power output of the transmitter is limited by the FCC, the antenna is critical in affecting transmission distance. Only a properly matched antenna system will allow maximum power output. Cobra loaded type antenna models are highly recommended for most installations. Consult your Cobra dealer for further details, or call 773.889.3087 and speak to a Cobra representative.

Note
For optimum performance in passenger cars the ideal antenna location is on the center of the roof. Second choice is on the center of the trunk.

Note
Because many newer trucks feature fiberglass door skins, the outside mirror must be grounded to the chassis via a ground strap when antenna is mounted on the mirror bracket.

Note
3-way Combination Antennas are also available which allow operation of all three bands (AM-FM & CB), using a single antenna. However, this type of antenna usually results in less than normal transmit and receive range when compared to a standard-type “Single Band” CB antenna. Call 773-889-3087 for further information.

A standard antenna connector is provided on the transceiver for easy connection.

Marine Installation

The transceiver will not operate at maximum efficiency in a boat without a ground plate, (unless it has a steel hull). Before attempting installation, consult your dealer for information regarding an adequate grounding system and prevention of electrolysis between fittings in the hull and water.
Ignition Noise Interference

Use of a mobile receiver at low signal levels is normally limited by the presence of electrical noise. The primary source of noise in automobiles is from the alternator and ignition system. Typically, when signal level is adequate, the background noise does not present a serious problem. Also, when extremely low level signals are being received, the transceiver may be operated with the vehicle’s engine turned off. The unit requires very little current and therefore will not significantly discharge the vehicle’s battery.

Even though the Cobra 29 LTD BC has an automatic noise limiter, in some installations ignition interference may be high enough to make good communications impossible. Many possibilities exist and variations between vehicles require different solutions. Consult your COBRA dealer or a 2-way radio technician for help in locating the source of a severe noise.
Operation

Turning On

Turning On

Make sure the power cord, antenna and microphone are connected to their proper connectors before starting.

1. The CB/PA button should be in the CB position.

2. Rotate the On/Off Volume knob clockwise to a normal listening level.
Setting Channel Selector

Select one of forty channels and adjust volume. The selected channel is indicated by the LED readout directly above the channel selector knob.
Calibrate For SWR (Standing Wave Ratio)

SWR calibration is done to properly adjust the length of the antenna and to monitor the quality of the coaxial cable and all RF connections. This calibration is critical in order to achieve optimum performance.

Note
Antenna Indicator LED will illuminate when TX if SWR is high.

1. **Select** channel 20.

2. **Switch** to the CAL position.
Operation

3 *Push and hold* mic button.

4 While *holding* mic button *adjust* the SWR CAL knob so the meter needle swings to the CAL ▼ mark on the meter (located on the right).

*Note*

*Calibration must be made in an open area (never in a garage). Vehicle doors must be closed. No one should be standing near the antenna. (See your antenna directions for more complete information).*

continued
Operation

**Note**
The reading will be slightly higher on Channels 1 and 40 compared to Channel 20.

**Note**
When switched to SWR position the meter needle should ideally be as far to the left as possible. Anything over 3 is not acceptable. The antenna indicator will light. A slight antenna height adjustment (higher or lower) may be required. Repeat recalibration steps.

5. While still holding down the mic button, set the S/RF SWR CAL switch to the SWR position, to read the SWR reading.

6. Repeat the same steps two through five on Channel 1 and 40. This will check SWR for all channels.
To Receive

1. Rotate the On/Off Volume knob clockwise; the green RX/TX LED will be illuminated.
Operation

Selecting A Channel

S-Meter

Selecting A Channel

1 \textit{Switch} to \textbullet\ NOR to select desired channel.

\section*{S-Meter}

Swings proportionately to strength of incoming signal when receiving.

1 The \textbullet\ S/RF-SWR-CAL switch must be in the S/RF position to read the meter.
The RF noise blanker is very effective in reducing repetitive noises such as ignition interference.

When switched to ANL position the RF Noise Blanker is also activated, providing increased noise filtration.

When switched to OFF position all noise filtration will be turned off.
Operation

Bright/Dim Switch

1. Switch to BRT or DIM to control brightness of the channel indicator and multi-function meter for day or nighttime driving.
RF Gain Control

The RF Gain is used to optimize reception in strong or weak signal areas.

1. *Rotate* the RF Gain knob *counterclockwise* to reduce gain in strong signal areas. In weak signal areas turn *clockwise* to increase gain.

Note

The RF Gain is used to optimize reception in weak signal areas.
Operation

Setting Delta-Tune

Delta-Tune functions as a “fine tune” control enabling you to capture a more readable signal, as well as eliminate adjacent channel interference.

1. Rotate \( \circ \) Delta-Tune knob to the center position for optimum tuning.

Setting Squelch

Squelch is the “control gate” for incoming signals.

1. Full \( \circ \) clockwise rotation closes the gate allowing only very strong signals to enter.
2. Full \textit{counterclockwise} rotation opens the “gate” allowing all signals in.

3. To achieve the Desired Squelch Setting (DSS), turn the Squelch control \textit{counterclockwise} until you hear noise. Now turn the control \textit{clockwise} just until the noise stops. This is the DSS setting.
Operation

To Transmit

Caution!
Be sure the antenna is properly connected to the radio before transmitting. Prolonged transmitting without an antenna, or a poorly matched antenna, could cause damage to the transmitter.

Be sure to read the F.C.C. Rules and Regulations included with this unit before transmitting.

Setting Dynamike®

This controls the microphone sensitivity (outgoing audio level).

1. Select desired channel.

2. Initially, set fully clockwise so that maximum voice volume is available. Dynamike® may have to be reduced in some conditions.
Transmit

Push and hold mic button to transmit. Transmitter is now activated. When transmitting, hold the microphone two inches from your mouth and speak in a clear, normal voice. Release to receive.

Setting TalkBack

This control is used to adjust the desired amount of modulation talk back that is present at the speaker during transmit. At fully counter-clockwise position the talk back is off.
Operation

RF Meter

RF Meter

This meter swings proportionately to the RF output (outgoing signal) while transmitting.

The S/RF-SWR-CAL switch must be in the S/RF position.
**External Speaker**

The external speaker jack is used for remote receiver monitoring.

1. Connect an external speaker to the external speaker jack on the rear panel.

---

**Note**

The external speaker should have 8-ohm impedance and be rated to handle at least 4.0 watts. When the external speaker is plugged in, the internal speaker is automatically disconnected.

**Note**

Cobra external speakers are rated at 10 watts.
Operation

PA (Public Address)

**Note**
Speaker should have 8-ohm impedance and be rated to handle at least 4.0 watts.

**Note**
The speaker should be directed away from the microphone to prevent acoustic feedback.

**Note**
Activity on the CB channel will be heard through the PA speaker. Adjust volume control to a normal listening level.

1. Connect an external PA speaker to the PA jack on the rear panel.

2. Set the CB/PA switch to PA position.
Operation

3 Push and hold microphone button and speak in a normal voice. Your voice will now transmit on the PA speaker.

4 Adjust PA speaker volume with the Dynamike® control.
Home And Office Set-Up

Base Station Operation (From 120V AC House Current)

To operate your transceiver from home or office you will need a 13.8 volt DC Power Pack rated at a minimum of 2 amps, and a properly installed base station antenna.

**Warning!**
Do not attempt to operate this transceiver by connecting it directly to 120v ac.

**Note**
For further information call Cobra Customer Service 773.889.3087.

1. Simply connect the red (+) and black (-) leads of the transceiver to the corresponding terminals of the power pack.
Temporary Mobile Set-Up

For temporary mobile operation you may want to purchase an optional automobile power adapter from your COBRA dealer. This adapter and a magnetic mount antenna allow you to quickly “install” your transceiver for temporary use.

1. Plug power cable into back of unit marked “Power.” Be sure to observe polarity markings.

2. Connect properly installed and matched base station antenna.
How Your CB Can Serve You

A Few Rules You Should Know

A. Conversations cannot last more than 5 minutes with another station. A one minute break is required to let others use the channel.

B. You cannot blast others off the air by use of illegally amplified transmitters or illegally high antennas.

C. You cannot use CB to promote illegal activities.

D. Profanity is not allowed.

E. You may not transmit music with a CB.

F. Selling of merchandise and/or services is prohibited.

1. Set to channel 9 for emergencies
   Be sure antenna is properly connected.

2. CB Distress Data
   When transmitting an emergency, you should request a “REACT BASE” and provide the CB distress data (called CLIP):

   - Call Sign: Identify yourself.
   - Location: Be exact.
   - Injuries: Number. Type. Trapped?
   - Problem: Give details and help needed.

   Transmit CLIP repeatedly so any monitor can assist.

Channel 9
Emergency Messages

Note
If no response on channel 9, try channels 19 or 14.
The FCC gives these examples of permitted and prohibited messages for channel 9. These are only guidelines and not all-inclusive:

<table>
<thead>
<tr>
<th>Permitted</th>
<th>Example Message</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>“Tornado sighted six miles north of town.”</td>
</tr>
<tr>
<td>No</td>
<td>“Post number 10. No tornado sighted.”</td>
</tr>
<tr>
<td>Yes</td>
<td>“Out of gas on I-95 at mile marker 211.”</td>
</tr>
<tr>
<td>No</td>
<td>“Out of gas in my driveway.”</td>
</tr>
<tr>
<td>Yes</td>
<td>“Four car accident on I-94 at Exit 11. Send police and ambulance.”</td>
</tr>
<tr>
<td>No</td>
<td>“Traffic moving smoothly on I-94.”</td>
</tr>
<tr>
<td>Yes</td>
<td>“Weather Bureau has issued thunderstorm warning. Bring sailboat into port.”</td>
</tr>
<tr>
<td>No</td>
<td>“Attention motorists. Weather Bureau advises snow tomorrow will accumulate 4 to 6 inches.”</td>
</tr>
<tr>
<td>Yes</td>
<td>“Fire in building at 539 Main, Evanston.”</td>
</tr>
<tr>
<td>No</td>
<td>“Halloween patrol number 3. All quiet.”</td>
</tr>
</tbody>
</table>
How Your CB Can Serve You

CB 10-Codes

CB 10-Codes

Citizen Bands have adopted the “10-CODES” for standard questions and answers. These codes provide quick and easy communication, especially in noisy areas. Following are some of the more common codes and meanings:

<table>
<thead>
<tr>
<th>Code</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>10-1</td>
<td>Receiving poorly</td>
</tr>
<tr>
<td>10-2</td>
<td>Receiving well</td>
</tr>
<tr>
<td>10-3</td>
<td>Stop transmitting</td>
</tr>
<tr>
<td>10-4</td>
<td>OK, message received</td>
</tr>
<tr>
<td>10-5</td>
<td>Relay message</td>
</tr>
<tr>
<td>10-6</td>
<td>Busy, stand by</td>
</tr>
<tr>
<td>10-7</td>
<td>Out of service, leaving</td>
</tr>
<tr>
<td>10-8</td>
<td>In service, subject to call</td>
</tr>
<tr>
<td>10-9</td>
<td>Repeat message</td>
</tr>
<tr>
<td>10-10</td>
<td>Transmission completed standing by</td>
</tr>
<tr>
<td>10-11</td>
<td>Talking too rapidly</td>
</tr>
<tr>
<td>10-12</td>
<td>Visitors present</td>
</tr>
<tr>
<td>10-13</td>
<td>Advise weather/roads</td>
</tr>
<tr>
<td>10-16</td>
<td>Make pick up at</td>
</tr>
<tr>
<td>10-17</td>
<td>Urgent business</td>
</tr>
<tr>
<td>10-18</td>
<td>Anything for us?</td>
</tr>
<tr>
<td>10-19</td>
<td>Return to base</td>
</tr>
<tr>
<td>10-20</td>
<td>My location is</td>
</tr>
<tr>
<td>10-21</td>
<td>Call by phone</td>
</tr>
<tr>
<td>10-22</td>
<td>Report in person to</td>
</tr>
<tr>
<td>10-23</td>
<td>Stand by</td>
</tr>
<tr>
<td>10-24</td>
<td>Completed last assignment</td>
</tr>
<tr>
<td>10-25</td>
<td>Can you contact</td>
</tr>
<tr>
<td>10-26</td>
<td>Disregard last info</td>
</tr>
<tr>
<td>10-27</td>
<td>Moving to channel</td>
</tr>
<tr>
<td>10-28</td>
<td>Identify your station</td>
</tr>
<tr>
<td>Code</td>
<td>Meaning</td>
</tr>
<tr>
<td>--------</td>
<td>-----------------------------------------------------------</td>
</tr>
<tr>
<td>10-29</td>
<td>Time is up for contact</td>
</tr>
<tr>
<td>10-30</td>
<td>Does not conform to FCC rules</td>
</tr>
<tr>
<td>10-33</td>
<td>Emergency traffic</td>
</tr>
<tr>
<td>10-34</td>
<td>Trouble at this station</td>
</tr>
<tr>
<td>10-35</td>
<td>Confidential information</td>
</tr>
<tr>
<td>10-36</td>
<td>Correct time is</td>
</tr>
<tr>

29 LTD BC Specifications

**GENERAL**
- Channels: CB - 40 CH
- Frequency Range: CB - 26.965 to 27.405 MHz
- Frequency Tolerance: 0.005%
- Frequency Control: PLL (phase lock loop) Synthesizer
- Operating Temperature Range: -30°C to +50°C
- Microphone: Plug-in dynamic
- Input Voltage: 13.8VDC nom. (positive or negative ground)
- Current Drain:
  - Transmit: AM full mod., 1.5A (maximum)
  - Receive: Squelched, 0.3A; full audio output, 1.2A (nominal)
- Size: 8-5/8" D x 7-9/32" W x 2-13/64" H
- Weight: 4 lbs.
- Antenna Connector: UHF; SO-239
- Meter: Illuminated; indicates relative power output, received signal strength and VSWR

**TRANSMITTER**
- Power Output: 4 watts
- Modulation: AM (Amplitude Modulation)
- Frequency Response: 300 to 3000 Hz
- Output Impedance: 50 ohms, unbalanced

**RECEIVER**
- Sensitivity: Less than 1 µV for 10 dB (S+N)/N
- Selectivity: 6 dB @ 7 KHz, 60 dB @ 10KHz
- Image Rejection: 80 dB, typical
- Adjacent-Channel Rejection: 60 dB, typical
- IF Frequencies: Double Conversion: 1st: 10.695 MHz
  - 2nd: 455 KHz
- Automatic Gain Control (AGC): Less than 10 dB change in audio output for inputs from 10 to 50,000 microvolts
- RF Gain Control: Adjustable for optimum signal reception
- Noise Blanker: RF type
- Squelch: Adjustable; threshold less than 1µV
- Audio Output Power: 4 watts
- Frequency Response: 300 to 3000 Hz
- Distortion: Less than 5% @3 watts @ 1000 Hz
- Built-in Speaker: 8 ohms, 5w
- External Speaker (Not supplied): 8 ohms; disables internal speaker when connected

**PA SYSTEM**
- Power Output: 4 watts into external speaker
- External Speaker for PA: 8 ohms, when PA-CB switch is in PA, (Not Supplied): The PA speaker also monitors the receiver; separate jack provided

(SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE)

**WARNING:** This product contains lead, a chemical known to the State of California to cause cancer and birth defects or other reproductive harm.
Wash hands after handling.
Limited One Year Warranty

COBRA ELECTRONICS CORPORATION warrants that its COBRA CB Radios, and the component parts thereof, will be free of defects in workmanship and materials for period of one (1) year from the date of first consumer purchase. This warranty may be enforced by the first consumer purchaser, provided that the product is utilized within the U.S.A.

COBRA will, without charge, repair or replace, at its option, defective CB radios, products or component parts upon delivery to the COBRA factory Service Department, accompanied by proof of the date of first consumer purchase, such as a duplicated copy of a sales receipt.

You must pay any initial shipping charges required to ship the product for warranty service, but the return charges will be at Cobra's expense, if the product is repaired or replaced under warranty.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Exclusions: This limited warranty does not apply;
1) to any product damaged by accident; 2) in the event of misuse or abuse of the product or as a result of unauthorized alterations or repairs; 3) if the serial number has been altered, defaced or removed; 4) if the owner of the product resides outside the U.S.A.

All implied warranties, including warranties of merchantability and fitness for a particular purpose are limited in duration to the length of this warranty. COBRA shall not be liable for any incidental, consequential or other damages; including, without limitation, damages resulting from loss of use or cost of installation.

Some states do not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you.

You can find quality Cobra products and accessories at your local Cobra dealer, or in the U.S.A., you can order directly from Cobra. See ordering info on page 37.
If You Think You Need Service

For technical assistance, please call our Automated Help Desk which can assist you by answering the most frequently asked questions about Cobra products.

(773) 889-3087
24 hours a day, 7 days a week.
A Consumer Service Representative can be reached at 773.889.3087
8:00 am - 6:00 pm, Monday through Friday, Central Time.
Technical assistance is also available on-line in the Frequently Asked Questions (FAQ) section at www.cobra.com or by e-mail to productinfo@cobra.com

If you think you need service call 773.889.3087

“If your product should require factory service please call Cobra first before sending your unit in. This will ensure the fastest turn-around time on your repair.”

You may be asked to send your unit to the Cobra factory. It will be necessary to furnish the following in order to have the product serviced and returned.
1. For Warranty Repair include some form of proof-of-purchase, such as a mechanical reproduction or carbon or a sales receipt. If you send the original receipt it cannot be returned.
2. Send the entire product.
3. Enclose a description of what is happening with the unit. Include a typed or clearly print name and address of where the unit is to be returned.
4. Pack unit securely to prevent damage in transit. If possible, use the original packing material.
5. Ship prepaid and insured by way of a traceable carrier such as United Parcel Service (UPS) or First Class Mail: to avoid loss in transit to: Cobra Factory Service, Cobra Electronics Corporation, 6500 West Cortland Street, Chicago, IL 60707 USA.
6. If the unit is in warranty, upon receipt of your unit it will either be repaired or exchanged depending on the model. Please allow approximately 3 to 4 weeks before contacting us for status. If the unit is out of warranty a letter will automatically be sent informing you of the repair charge or replacement charge. If you have any questions, please call 773.889.3087 for assistance.

Cobra®, Dynamike®, Nothing Comes Close to a Cobra® and the snake design are registered trademarks of Cobra Electronics Corporation, USA.
Cobra Electronics Corporation™ is a trademark of Cobra Electronics Corporation, USA.
The Citizens Band lies between the shortwave broadcast and 10-meter Amateur radio bands, and was established by law in 1949. The Class D two-way communications service was opened in 1959. (CB also includes a Class A citizens band and Class C remote control frequencies.)

**FCC Regulations**

FCC regulations permit only “transmissions” (one party to another) rather than “broadcasts” (to a wide audience). Thus, advertising is not allowed on CB Channels because that is “broadcasting.”

**FCC Warnings**

All transmitter adjustments other than those supplied by the manufacturer as front panel operating controls, must be made by, or under the supervision of, the holder of an FCC-issued general Radio-Telephone Operator’s License.

Replacement or substitution of transistors, regular diodes or other parts of a unique nature, with parts other than those recommended by Cobra, may cause violation of the technical regulations of Part 95 of the FCC Rules, or violation of Type Acceptance requirements of Part 2 of the Rules.

You should read and understand Part 95 (included with this unit) of the FCC Rules and Regulations, before operating your Cobra radio, even though the FCC no longer requires you to obtain an operator’s license.
