

Pair the BlueParrott Headset with your Smartphone

- 1 Turn Headset power **OFF**.

- 2 Press and Hold the BlueParrott power button until you hear "Pair Mode".

- 3 Turn your Smartphone Bluetooth **ON** and select the BlueParrott Headset Model in the Bluetooth Settings.

Pair your Headset with the All Road

- 1 Turn the Bluetooth **OFF** on your Smartphone.

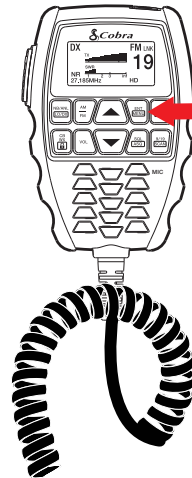

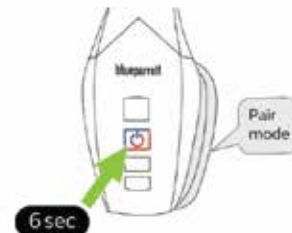

- 2 Turn BlueParrott Headset power **OFF**.

- 3 Press and Hold the BlueParrott power button until you hear "Pair Mode".

- 4 Press and hold the **MENU** button on the All Road. Select **BLUETOOTH>PAIR >HEADSET>SCAN DEVICE**.

- 5 Select the BlueParrott Headset Model from the device list.

- 6 The All Road will deliver a message it is pairing and will display **HEADSET PAIRED** once the process is complete.

Customize the BlueParrott Button™ for PTT

- 1 Download the BlueParrott App and Select All Road from the BlueParrott Button Menu options.

- 2 **How to Use PTT:**

- Default setting is 'Push and Hold' PTT
- Optional configuration for 'One Touch' PTT can be found in the All Road CB Menu:
 - Press and hold MENU button on All Road.
 - Select BLUETOOTH > PAIR > WIRELESS PTT > ONE TOUCH PTT > ON.

NOTE: Without customizing the button, the headset can be used for both phone calls and CB transmissions, but will need one of the following PTT options for CB use:

- All Road Handset
- All Road Wireless PTT Button (sold separately)

Cobra® 75 All Road Wireless CB and BlueParrott™ Headset

Using the 75 All Road Wireless CB with the BlueParrott™ Headset

Cobra has partnered with BlueParrott to further enhance your two-way radio experience by customizing the special "BlueParrott Button" as a PTT function while communicating with the 75 All Road CB.

While the 75 All Road Wireless CB Radio will connect to most wireless headsets for handsfree communications between your CB and Smartphone, only BlueParrott headsets can be used to PTT without the need for the all-in-one handset or 75 All Road Wireless Push-To-Talk Button to transmit while using the 75 All Road CB.

Having this feature is an all-in-one solution for 75 All Road users to communicate with friends on the CB and Smartphone while on or off-road. Use this Guide to configure and customize your BlueParrott headset for use with the 75 All Road.

BlueParrott Headset Features

- A. BlueParrott Button: Voice Commands or Customize (in App)
- B. Multifunction Button: Reject Incoming Call, Switch between Calls & All Road
- C. (+) Button: Volume UP & Mute function
- D. (-) Button: Volume DOWN, Redial last outgoing call, Transfer Audio to Phone while on a call
- E. Microphone

How PTT Works with the All Road

All Road Users with or without a Wireless Headset will require the Handset or Wireless PTT Button to transmit. Push-to-Talk works by:

- 1 Using the Handset, or...

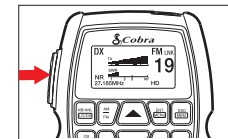

- 2 Pairing the wireless PTT button or...

- 3 Pairing a wireless headset, then:

- a. Using either the PTT Button on the handset or
- b. The wireless PTT Button

NOTE: Only the BlueParrott headset allows PTT from the headset. No other headset on the market can be used for PTT or to transmit CB communications directly from the headset mic.

How PTT works with BlueParrott Headsets

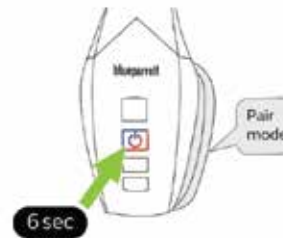

For BlueParrott Users, the PTT interface can be accessed by customizing the BlueParrott button on the side of the headset through the BlueParrott App. This customization is exclusive to BlueParrott Users by taking the following steps:

- 1 Pair the BlueParrott Headset to a Smartphone.

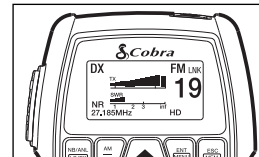

- 2 Download the BlueParrott App and select 75 All Road from its BlueParrott button menu.

- 3 Pair the Headset to the All Road.

- 4 Configure PTT settings through the All Road CB Menu (this is optional).
