Making Life Easier and Safer

Staying in touch with your family and friends is convenient and safe when using your microTALK® radio. Some of the many uses you will discover include:

• Communication while out walking or riding bikes
• Talking to other drivers when pulled over for a traffic violation
• Shopping with your family and friends
• Family camping and hiking
• Tracking and finding friends at crowded public events, catching with fellow campers

Your radio will operate in two modes: simplex and monitoring. In simplex, you and anyone else who can hear your transmission will receive the message you send. In monitoring, you can listen to all radio transmissions in the same range as your radio and respond to an audio alert when your channel is called.

Before using your microTALK® radio while on the go...

Calibrate your microTALK® radio fairly easy using a simple calibration process.

1. Hold your radio towards a wall, away from any other radio receiver.
2. Switch the volume knob fully clockwise.
3. Press the CALL button on the radio.
4. Hold down the TALK button on the radio.
5. Release the CALL and TALK button.
6. Release the volume knob to test.

The radio will display a series of numbers, with each number being ten times greater than the previous number. Keep the volume knob set at this position. Re-calibrate your radio after changing batteries.

Customer Assistance

Product Service & Support

For any question about using your Cobra branded product, R Santos CONTACT US FIRST. Do not return product to the retailer. The retailer may be able to ship you a new product and charge for it.

To obtain service or for information about products purchased from S.P.Z., please contact their customer service representative at their toll-free number of 1-800-262-5447 or at our local number of 1-949-875-7957. The representatives are trained to help you with any problem, and, most importantly, to your address and telephone number. For information service information outside the U.S., please consult your local dealer.

For further information on our products features, visit our web site, (http://www.cobra.com) for Frequently asked questions and the electronic manual.

Listening for a Response

Press the TALK button to receive audio information about your transmission. Your Cobra microTALK® radio is a simplex radio. It will display the radio icon while the Talk button is pressed.

To Adjust Volumes

Press the Volume Up or Volume Down buttons on the Cobra microTALK® radio. You can scroll through the eight volume levels.

LED/S.O.S. Flashlight

Press and hold the LED/S.O.S. Flashlight button to activate the LED/S.O.S. Flashlight feature. This is an extremely useful feature that allows you to turn the flashlight on/off for a few seconds, or continuously for a long period of time. To turn the LED/S.O.S. Flashlight feature back off, press the LED/S.O.S. Flashlight button a second time.

Auto Squelch/Maximum Range

Your Cobra microTALK® radio will automatically adjust the volume to a level that is considered normal to easily receive transmissions and minimize any annoying background noise to levels of comfort, according to conditions you've noticed your radio is receiving.

You can program your radio to turn on an automatic squelch whenever the maximum range exceeded. To do this, go to the “Receive” menu and adjust the maximum range of your radio.

Selecting a Channel

Auto Squelch/Maximum Range

Your Cobra microTALK® radio will automatically adjust the volume to a level that is considered normal to easily receive transmissions and minimize any annoying background noise to levels of comfort, according to conditions you've noticed your radio is receiving.

You can program your radio to turn on an automatic squelch whenever the maximum range exceeded. To do this, go to the “Receive” menu and adjust the maximum range of your radio.

Installing Batteries

To temporarily turn off auto squelch:

Press the Mode/Power button to select the "Auto Squelch/Max Range" option. Press and release the TALK button to turn on the LED/S.O.S. Flashlight feature. This is an extremely useful feature that allows you to turn the flashlight on/off for a few seconds, or continuously for a long period of time. To turn the LED/S.O.S. Flashlight feature back off, press the LED/S.O.S. Flashlight button a second time.

To turn maximum range off:

Press the Mode/Power button to select the "Max Range/Maximum Range" option. Press and release the TALK button to turn on the LED/S.O.S. Flashlight feature. This is an extremely useful feature that allows you to turn the flashlight on/off for a few seconds, or continuously for a long period of time. To turn the LED/S.O.S. Flashlight feature back off, press the LED/S.O.S. Flashlight button a second time.

It is important to note that your Cobra microTALK® radio will automatically adjust the volume to a level that is considered normal to easily receive transmissions and minimize any annoying background noise to levels of comfort, according to conditions you’ve noticed your radio is receiving.

You can program your radio to turn on an automatic squelch whenever the maximum range exceeded. To do this, go to the “Receive” menu and adjust the maximum range of your radio.

Installing Batteries
