Important Information

Safe Driving
Motorists, as well as operators of emergency or service vehicles, are expected to exercise all due caution while using this product, and to obey all applicable traffic laws.

Security of Your Vehicle
Before leaving your vehicle, always remember to conceal this device in order to reduce the possibility of break-in and theft.

Privacy
This device may not be used to violate the privacy rights of others. In no way will Cobra Electronics or its subsidiaries be responsible for inappropriate use of this product. It is the sole responsibility of the buyer to consult legal counsel for the interpretation of any laws applicable to the area of intended use of this product.

Customer Assistance

www.cobra.com
Congratulations! You've made a smart choice by purchasing a Drive HD Dash Cam from Cobra. This booklet describes the simple steps for mounting, setting up, and using your dash camera.

**Camera Features**

- Records 1296P Super HD or 1080P Full HD video. Ambarella™ chipset ensures excellent image quality, night time performance, and advanced dynamic range.
- WiFi capability allows the CDR 900 to connect wirelessly with the Drive HD™ app for viewing live video, controlling the camera, uploading and sharing videos, adjusting settings, and Cloud Mode on your smartphone.
- Ultra wide 160° viewing angle films the entire road and your peripherals without edge distortion.
- Continuous Loop Recording overwrites old footage unless you want to save it. A time/date stamp is embedded on all recordings so you’ll never miss an event while driving.
- 3-axis G-Sensor senses sudden accelerations and collisions and automatically protects footage surrounding the incident.
- Built-in microphone & speaker
- Auto-Record and Auto-Power Off

**Product Features**

- Ready to use out-of-the-box. Includes a heavy-duty suction cup to mount the camera to your windshield and an 8GB MicroSD card to Record your Ride.
- Optional waterproof case (not included)
- Speaker
- Power / Menu Button
- Status Indicator
- Tripod Mount
- Micro SD Card Slot
- Lens
- Micro USB Port
- Micro HDMI® Port
- Mic
- GPS Receiver Slot

---

**Limited 1-Year Warranty**

Cobra Electronics Corporation warrants that this product and the component parts thereof, will be free of defects in workmanship and materials for a period of one year from the date of first consumer purchase. This warranty may be enforced by the first consumer purchaser. If the product is under warranty, it will be repaired or exchanged depending on the model as determined at Cobra’s sole discretion. Such remedy shall be your sole and exclusive remedy for any breach of warranty.

The procedure for obtaining service and support, and the applicability of this warranty, will vary depending on the country or jurisdiction in which you purchased and utilize the product. For the details on obtaining product service, support and warranty please visit www.cobra.com/support.

Provided that the product is utilized within the U.S.A.-Cobra will, without charge, repair or replace, at its option, defective products, products or component parts upon delivery to the Cobra Factory Service department, accompanied by proof of the date of first consumer purchase, such as a duplicated copy of a sales receipt.

You must pay any initial shipping charges required to ship the product for warranty service, but the return charges, to an address in the U.S.A., will be at Cobra’s expense, if the product is repaired or replaced under warranty.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state and country to country.

**Exclusions:** This limited warranty does not apply:
1) To any product damaged by accident; 2) In the event of misuse, ordinary wear, failure to follow directions, or improper maintenance of the product or as a result of unauthorized alterations or repairs; 3) If the serial number has been altered, defaced, or removed; 4) If the product was purchased or is utilized in a jurisdiction not covered by the limited warranty.

All implied warranties, including warranties of merchantability and fitness for a particular purpose are limited in duration to the length of this warranty. Cobra shall not be liable for any incidental, consequential or other damages; including, without limitation, damages resulting from loss of use or cost of installation.

Some states and countries do not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state and country to country.

What’s in the Box

Dash Cam (Model # CDR 900)

Heavy Duty Suction Cup Mount

8GB Micro SD Card (installed)

Cigarette Lighter Adapter

Micro USB to USB Cables (1 foot power/data & 12 foot power only)

Tripod Connector

Lanyard and Lanyard Mount

NOTE: While the 12 foot and 1 foot cables look similar, they have different functions. The 12 foot cable is for power only and enables Auto-Power ON and Auto-Record. The 1 foot cord is for data transfer to a computer.

Installation

Where to Mount Your Unit

You will get optimum performance from your camera if you mount it on the front windshield, behind the rear-view mirror. This will minimize the impact on the driver’s line of sight. You’ll also want to keep the camera centered and angle the bracket to optimize the camera’s view of the road ahead.

Windshield Mounting

1. Peel the plastic film off of the suction cup.
2. Screw the tripod mount onto the base of the suction cup mount.
3. Slide your CDR 900 onto the tripod mount using the channel on the top of the unit.
4. To adjust the angle to the road, loosen the angle locking ring, turn the camera so that it has a clear view of the road ahead and tighten the knob.
5. Press the Suction Cup firmly onto the windshield. Push down on the lever to lock the suction cup in place.
6. Plug the 12 foot Micro-USB cable into the camera.
7. Plug the cigarette lighter adapter on the power cord into your vehicle’s cigarette lighter.
8. You can temporarily remove the camera by sliding it off the tripod mount.

Installation

To return to video mode press the Record Button.

Photograph: Press the Photograph/Playback Button to enter photograph mode. Press the button again to snap still photos.

Continuous Cyclical Recording

Once your memory card is full, this camera will continuously overwrite the oldest footage recorded. To protect a clip so that it will not be overwritten, press the Lock File Button. The icon will show on the screen.

NOTE: The CDR 810 should be mounted to the windshield, behind the rear-view mirror. Both the Video and Audio recorders are built into the camera. To enter Video mode, press and hold the On/Off Button. The REC indicator light will be on. If you are rotating the camera to view the cab, make sure to change the Rotate Setting to ON in the Tools Menu.

Operation

1. Press the Menu Button to enter into the main menu. Press the Menu Button again to cycle through basic and menu-specific settings lists. To navigate through the menus, use the Up and Down buttons, which double as Rec and Mic respectively. Press the File Lock/Enter Button to enter specific mode-specific settings lists. To navigate through the menus, use the Up and Down buttons, which double as Rec and Mic respectively.
2. Press the Menu Button to enter into the menu. Press the File Lock/Enter Button to enter specific mode-specific settings lists. To navigate through the menus, use the Up and Down buttons, which double as Rec and Mic respectively.
Charging the device

You can charge the device with the included car charger, or with any micro USB cable.

When the system is OFF, the status indicator flashes orange.

When the system is ON, the unit will charge in the background without any icon shown.

Inserting and removing the Memory Card

Your camera comes with an 8GB Micro SD Card preinstalled, but it can support up to 64GB Micro SD cards (not included).

To remove the memory card, push the Memory card forward gently until you hear a click, and the card should release.

To insert a different memory card, orient the card as shown and press it in until you hear a click.

Camera Operation

Dash Cam Mode vs Action Cam Mode

The CDR 900 has two recording modes for different applications:

- **Dash Cam Mode**: Shoots continuous loop and emergency videos.
- **Action Cam Mode**: Shoots normal videos.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Action Cam</th>
<th>Dash Cam</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recording Type</td>
<td>Normal</td>
<td>Continuous Loop</td>
</tr>
<tr>
<td>To Start Recording</td>
<td>Press in preview</td>
<td>• Car impact</td>
</tr>
<tr>
<td>Recording Duration</td>
<td>Unlimited</td>
<td>Three Minute Segments</td>
</tr>
<tr>
<td>Display Info</td>
<td>00:06:36 Remaining on SD card</td>
<td>2014/01/01 21:06:35 Current date &amp; time</td>
</tr>
</tbody>
</table>

Continuous Loop Recording: Once the memory card is full, this camera will continuously overwrite the oldest footage recorded.

G-Sensor: The G-Sensor is an accelerometer that can detect an impact caused by an accident. If the G-Sensor is triggered the camera will automatically save the footage 30 seconds before and after the incident to a protected file that will not be overwritten by loop recording.

**NOTE**: By default, the CDR 900 formats the SD card so that 50% of the memory is used for Action Cam Mode and 50% is reserved for Dash Cam Mode. This allocation can be modified through settings in the App.
### Camera Operation

#### Camera Operation

**To Start recording video**
- Press  to turn the camera on.
- Press  to begin recording.
- While recording, press  to stop recording.

**Visual Display**
- The camera screen turns on to show a live preview of the camera image.
- Recording begins and the letters REC flash in red.
- The recording stops and letters REC disappear.

**To make an Emergency Recording**
- While recording, press  and then .

**Visual Display**
- The icon flashes on the top bar and shows a progress percentage of the locked file being recorded.

**To cancel an Emergency Recording**
- While in an emergency recording, press  and then .
- Press  to confirm.

**Visual Display**
- The emergency recording will stop and the camera will return to standard recording mode.

**To Toggle the Microphone on / off (while recording)**
- Press  to bring up the recording menu.
- Then, immediately press  to toggle the sound recording.

**Visual Display**
- The bottom bar changes to show controls for Microphone Mute and File Lock.
- The microphone icon will appear or disappear from the top bar.

**To Power the device off**
- Note: In dash cam mode the device will power off automatically when power is disconnected from the unit. The length of time is determined by the Delay Power Off setting in the App.
- Press and hold  for 2 seconds.

**Visual Display**
- The device will power off and the screen will go dark. If the device is still connected to USB power, the orange LED may flash to indicate the battery is charging.

**OR**

**To cancel an Emergency Recording**
- While in an emergency recording, press  and then .

**Visual Display**
- The emergency recording will stop and the camera will return to standard recording mode.
**Video playback:**  
If you’re currently recording video, you need to stop recording video first.

Press to bring up the main menu:

**Visual Display**

The main Menu will appear:

Select and use the buttons to view Action Cam or Dash Cam files.

Playback Selection Screen will appear:

**Using the Playback Screen**

Use the NEXT and SELECT soft keys to select, play and delete files or return to the main menu screen.

Videos can also be viewed and managed using the Drive HD™ App or a computer (explained later in this manual).
Adjusting the Main Menu Settings

Press \[ \text{ \text{Menu}} \] to open the main menu. Use the NEXT and SELECT soft keys to navigate and toggle settings.

<table>
<thead>
<tr>
<th>Menu Settings</th>

</tr>
<tr>
<td><strong>Settings</strong></td>
<td>Select this option if you want to reset your camera to factory settings, or format your SD card.</td>
</tr>
</tbody>
</table>

These are basic settings only. More advanced settings can only be changed through the mobile App.

Connecting to a Computer

To connect your camera to a Computer

Connect the camera to your computer using the included USB to Micro-USB Cable.

By default, your device connects to your PC in Mass Storage mode, and acts like a flash drive. Videos are stored in the MP4 format. These files can be opened with the video player that came with your operating system, or with many third party video players.

Videos that are locked can be found in the “Emergency” folder, and Videos that are not locked can be found in the “DCIM” folder.

Note that while in Dash Cam mode, if the Memory card gets full, videos that are not locked will be overwritten to make room for new videos. If you want to save any videos that are in the DCIM folder, you should copy them to your computer, or lock the files.

To connect your camera to a TV

If your TV supports HDMI® input, you can connect a Micro HDMI to HDMI cable (not included) between the camera and the TV. The camera screen will be duplicated on your TV screen.
The WiFi capability of the CDR 900 allows you to view live video, control the camera, upload and share videos, or adjust settings; all from your smartphone. The first step to connect your smartphone with the CDR 900 is to download and install the Drive HD™ App, available for Android™ on the Google Play Store and for iOS on the App Store.

The camera can connect to the App in two ways:

1. **Local Direct Connection**

   The smartphone connects to the CDR 900 directly via WiFi for remote control, live view, album management and camera setup.

2. **Cloud-Based Internet Connection**

   The CDR 900 connects to a wireless access point and uploads live video to the internet cloud server, which can be viewed with your smartphone from anywhere.

To connect your camera to the App - Local Mode

On the Camera, make sure recording is stopped. Go into the main menu settings and turn ON the Wi-Fi Local option.

Back on the video preview screen, you should now see a white Wi-Fi icon in the upper left corner of the camera screen. This means your camera’s Wi-Fi hotspot is active.

Go to the Wi-Fi settings on your smartphone and look for a new network that starts with “Cobra —.” Connect to this network.

On your smartphone, launch the Drive HD™ App. It will present you with two options: Local and Internet. Choose Local, and then choose the Cobra camera from the list.

**NOTE:** It may take up to a minute after you have connected to the camera for it to show up on the App’s device list.

If the Cobra camera is not appearing in the list, press the button to refresh. In rare cases, you may also have to reboot both the smartphone and the camera to get them to connect the first time.
### Smartphone App Operation

The WiFi Local connection on the Drive HD™ App has three tabs across the bottom. The buttons in each tab, and their functions, are described below.

#### View Tab

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Rec/Stop icon" /></td>
<td>Tap this button to start and stop recording. These files will be saved on the camera’s SD card memory, not on your smartphone.</td>
</tr>
<tr>
<td><img src="image" alt="Video to smartphone icon" /></td>
<td>Tap this button to start and stop recording video. These files will be saved to your smartphone’s camera roll (on iOS) or Photo Gallery (on Android).</td>
</tr>
<tr>
<td><img src="image" alt="Still image to smartphone icon" /></td>
<td>Tap this button to take a still picture. This file will be saved to your smartphone’s camera roll (on iOS) or Photo Gallery (on Android).</td>
</tr>
<tr>
<td><img src="image" alt="Talk from smartphone to camera icon" /></td>
<td>Tap this button to turn on your smartphone’s microphone and send the audio over Wi-Fi to be played on the camera’s speaker.</td>
</tr>
<tr>
<td><img src="image" alt="Multi-Camera view icon" /></td>
<td>If you have multiple Cobra cameras in your system, tap this button to see them all at the same time. Tap one of the camera images to go back.</td>
</tr>
<tr>
<td><img src="image" alt="Flip Vertical icon" /></td>
<td>Flip the image upside down. This is best if the camera is mounted on a tripod.</td>
</tr>
</tbody>
</table>

#### Album Tab

<table>
<thead>
<tr>
<th>Tab</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dash Cam tab</td>
<td>Tap on this tab to view the list of videos taken in the dash cam mode.</td>
</tr>
<tr>
<td>Action Cam tab</td>
<td>Tap on this tab to view the list of videos taken in the action cam mode.</td>
</tr>
<tr>
<td>Playback buttons</td>
<td>Tap on one of these buttons to play back any video from the list.</td>
</tr>
<tr>
<td>Trash icons</td>
<td>Tap on one of these buttons to delete a video. This cannot be undone.</td>
</tr>
</tbody>
</table>

#### Setup Tab

<table>
<thead>
<tr>
<th>Setting</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Camcorder Name</td>
<td>You can rename your Camcorder here and set a password if you wish.</td>
</tr>
<tr>
<td>Date and Time</td>
<td>Here you can send your phone’s system time to the Camera with just one tap.</td>
</tr>
<tr>
<td>Resolution</td>
<td>This sets the level of detail in the video. FHD is the default value and records in 1080P Full HD. SHD is 1296P Super HD, which provides higher resolution video. Note that not all players support 1296P.</td>
</tr>
<tr>
<td>Operation Sound</td>
<td>Toggle the Dash Cam’s button tone on/off.</td>
</tr>
<tr>
<td>Factory Settings</td>
<td>Select this option if you want to reset your camera to factory settings. This will NOT erase the videos you have stored on your SD card.</td>
</tr>
<tr>
<td>Format SD Card</td>
<td>Here you can fully erase the videos on your SD Card, and adjust how much space you want to make available to cyclical recording in Dash Cam mode. Drag the slider from left to right to set the ratio.</td>
</tr>
<tr>
<td>Language</td>
<td>Choose your preferred language for the CDR 900.</td>
</tr>
<tr>
<td>Internet settings</td>
<td>Here you can register a free cloud account so you can access your camera from your smartphone from anywhere in the world.</td>
</tr>
<tr>
<td>Voice Record</td>
<td>If you do not want this device to record audio with its internal microphone, turn this setting off (Dash Cam mode only).</td>
</tr>
<tr>
<td>Auto Record</td>
<td>If this setting is turned on, The camera will automatically start recording video when it receives power from the car charger (Dash Cam mode only).</td>
</tr>
<tr>
<td>Screen Auto Off</td>
<td>If this setting is turned on, the screen will automatically go dark after 60 seconds of inactivity. The camera will continue recording (Dash Cam mode only).</td>
</tr>
<tr>
<td>Motion Detector</td>
<td>If this setting is turned on, the camera will automatically start recording video if it detects movement in view of the camera. Video recording stops when there is no movement.</td>
</tr>
<tr>
<td>Delay Power Off</td>
<td>Here you can select how long the camera waits to shut down after power is removed. Select 10 second delay, or immediately off.</td>
</tr>
<tr>
<td>Impact Sensor</td>
<td>Sets the sensitivity of the Impact Sensor (G-Sensor). Options include High, Low, and Off. The impact sensor, when triggered, will automatically lock files to prevent them from being automatically deleted by continuous loop recording.</td>
</tr>
</tbody>
</table>

**NOTE:** Video files are very large so it may take some time for videos to update.
To connect your camera to the Cloud

Because your camera has Wi-Fi, it can be connected to the internet (the Cloud). Once connected, your camera can be accessed from anywhere you carry your smartphone. This is useful if you want to check on the status of your home or loved ones while you are away. If your home already has a Wi-Fi network, then you’ll need to put the SSID (network name) and password into the Cobra Drive HD app, and then your camera will connect to the internet.

If the location where you are using your camera does not have a Wi-Fi network yet, consider a wireless router, or Mobile hotspot product to get your camera connected to the internet.

When you’re done, your final network will look something like the chart below.

<table>
<thead>
<tr>
<th>Internet</th>
<th>Cloud Server</th>
<th>Wireless Router</th>
<th>3G/4G Mobile Hotspot</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smartphone</td>
<td></td>
<td>3G/4G Mobile Wireless Router</td>
<td>CDR 900</td>
</tr>
</tbody>
</table>

To configure Cloud Mode

Connect your camera to the App using the Local Mode instructions on page 13.

Inside the app, tap on the “Setup” tab at the bottom, and scroll down to “Internet settings.”

Under Access Point (AP) tap the button labeled “Click here to Add Cloud AP”

Tap your home network name from the list. If your home network name does not now show up in the list, tap “other” and enter your network name (SSID) and password manually.

Tap the “Setup” button in the upper left to go back to setup.

In the Email Box, Enter your email address. This is needed to help protect your privacy, so only you can access your camera over the cloud.

Tap the Green save button, and hit OK.

Exit the smartphone app, and your camera should return to the video preview screen.

Turn on Wi-Fi Cloud in the Main Menu settings of the camera.

After you exit the settings, the camera will show the video preview screen with a green cloud icon in the upper left corner.

Make sure your smartphone is now connected to the internet, via the cellular network or via Wi-Fi.

Open the Cobra Drive HD app, and tap on the Cloud Icon that says “internet.”

Your camera will appear in the list. Tap it. After a short while, your camera’s image will be visible.

If you ever need to get back into your camera settings again, follow the instructions on page 13 to get back into Local Wi-Fi Mode.
Motion Detector Setup

If this setting is turned on, the camera will automatically start recording video if it detects movement in view of the camera. Video recording stops when there is no movement.

1. Go to App ➜ (Setup) ➜ (Car DVR Settings), Turn on (Motion Detector) ➜ Tap (Save).

2. The CDR 900 will show 🕒 on the standby screen.

3. When the power cord is removed from the unit or the switched power supply turns off, select (Active) to start Motion Detector mode.

Specifications

Camera Specifications:
- Visual Angle: 160 degrees
- Sensor: 3 MP CMOS
- Video resolution: Super HD 1296P, 2304 x 1296 30 fps, Full HD 1080P, 1920 x 1080 30 fps
- Video Format: MP4
- White Balance: Auto
- Color Effect: Auto
- Continuous Loop Recording: Supported
- Motion Detection: Supported
- Date and Time: Supported
- Media Supported: SD Card - 8GB Included (64GB Max)
- Sound Recording: Synchronous video and sound record
- Sound Recording can be disabled: Supported
- Player Software: Use Operating System’s video player
- USB Interface: USB 2.0
- Display Screen: 2.0” TFT
- Battery Capacity: 700 mAh
